Innovating pathology essentials. Together.

Because patients count on you, StatLab provides pathology solutions you can count on. From stains and slides to printers and microtomes, StatLab manufactures supplies for every step in the pathology workflow – so you can spend less time managing inventory and more time on patient care.

✔ **Consistent Quality**

Innovative, high-performance products help you work more effectively when it matters most. The AP lab is the starting point for the diagnostic journey, and our solutions can help you standardize processes while maintaining quality to support fast, reliable diagnoses.

✔ **Reliable Availability**

A US- and EU-centric supply chain ensures you get what you need, when you need it. By manufacturing the end-to-end pathology workflow, our customers benefit from a supply chain that's shorter, more stable, and more reliable, decreasing risk for labs.

✔ **End-to-end Compatibility**

Our products are designed to work seamlessly—so you can, too. When equipment and consumables are developed and manufactured together, labs get an integrated solution designed for efficiency and peace of mind.

Your supplier should be an asset, not a liability. When you work with StatLab, you work with a partner who focuses on you. From helping solve challenges in the lab to installing and integrating equipment, we keep you—and your patients—at the center.

OVER 5,000 PRODUCTS MADE IN THE USA AND EUROPE

Delivering exceptional quality, reliability, and compatibility for every step of your pathology workflow.

1,000 mL container, 4/case	NB32480	
3,800 mL container, 4/case	NB3800	

Formalin Alternatives

GREEN ExCell Plus™

ExCell Plus™ is a tissue fixative is a low-hazard alternative to 10% formalin—and the only tissue fixative that actually smells pleasant! ExCell Plus™ contains no heavy metals, and penetrates most tissue specimens as fast as 10% Formalin.

20 mL, 96/case	FXEXP20CS	SC
120 mL, 48/case	FXEXP120CS	SC
250 mL, 12/case	FXEXP250CS	
1000 mL, 6/case	FXEXP1KCS	

GREEN Michels Solution

Michels Solution preserves and transports specimens for examination in immunofluorescence studies. While not a fixative, specimens can be held at room temperature for five days in transport medium before processing. This simple salt solution maintains pH, but does not kill most pathogens. Specimens received in transport medium should be washed in three changes of Michels Wash Solution (10 minutes for each wash). Not suitable for FISH studies.

7 mL container, 100/case	MS0735	SC
20 mL container, 96/case	MS0507	SC

WASH SOLUTION

Michels Wash Solution, 32 oz	MS-32	
------------------------------	-------	--

Additional Formalin Fixatives

Formalin, 10% Modified Carson/Millonig

The Carson Millonig modified buffering formulation preserves tissue specimens for both light and electron microscopy, and can be used in place of traditional 10% NBF.

20 mL container, 96/case	CM1507	SC
40 mL container, 96/case	CM1115	SC
60 mL container, 96/case	CM1230	SC
120 mL container, 96/case	CM1460	SC

Zinc Formalin, Buffered

Ready-to-use Zinc Formalin solution. Especially recommended for use in immunohistochemistry, as zinc formalin preserves more immunoreactivity than standard NBF.

20 mL containers, 96/case	BFZ0507	SC
40 mL containers, 96/case	BFZ0115	SC
60 mL containers, 96/case	BFZ0230	SC
120 mL containers, 96/case	BFZ0460	SC

Cold Weather Solutions

Neutral Buffered Formalin with 10% Alcohol

This special alcoholic formalin blend is an ideal year-round fixative but is especially suitable for laboratories in colder climates. The addition of alcohol makes the solution more resistant to freezing temperatures.

7 mL container, 100/case	ANB0735/100
--------------------------	-------------

Neutral Buffered Formalin with 5% Alcohol

Special alcoholic formalin blend is an ideal year-round fixative but is especially suitable for laboratories in colder climates. The addition of 5% alcohol makes the solution more resistant to freezing temperatures.

20 mL container, 96/case	ANB0507
40 mL container, 96/case	ANB0115
60 mL container, 96/case	ANB0230

Specialty Fixatives

GASTRO GI Fix

Designed for use on gastrointestinal and liver tissues. Produces high quality results on tissues containing large amounts of mucin, inflammatory cells, and cytoplasmic RNA while eliminating the use of hazardous chemicals.

20 mL containers, 96/case	GIFIX0507	SC
40 mL containers, 96/case	GIFIX0115	SC
60 mL containers, 96/case	GIFIX0230	SC

LYMPH B-Plus™ Fix

Fix B-Plus Fix is a proprietary fixative that is excellent for bone marrow and lymph node biopsies, and is a safe and excellent alternative to mercury-based fixatives. New sizes available.

20 mL containers, 96/case	BFIX0507	SC
40 mL containers, 96/case	BFIX0115	SC
60 mL containers, 96/case	BFIX0230	SC
90 mL containers, 96/case	BFIX0345	SC
120 mL containers, 96/case	BFIX0460	SC

PROSTATE Prostate Biopsy Fixative (w/Eosin)

Specially formulated for prostate biopsies. Contains formalin, alcohol, with a slight Eosin tint to ensure easy identification of biopsies after processing and embedding.

20 mL containers, 500/case	PF0507B500	SC
----------------------------	------------	----

PROSTATE UroFix

An excellent fixative for prostate biopsies. Preserves nuclear detail extremely well, and penetrates tissue quicker, thereby shortening fixation times.

20 mL containers, 96/case	UF0507	SC
120 mL containers, 96/case	UF0460	SC
240 mL containers, 72/case	UF08120	SC

CYTOLOGY Cytology Prefills

50 mL CytoVial 95% Alcohol, 100/case	CVP-9500/100	
120 mL CytoStat-Red, 96/case	CSR-120mL	SC
30mL StatPrep NonGyn Prefills, 100/case	CY50-NONGYN/30ML	
20mL StatPrep NonGyn Prefills, 100/case	CY50-NONGYN/20ML	SC
20mL StatPrep Gyn Prefills, 100/case	CY50-GYN/20ML	SC

See page 122 for more information.

BULK FIXATIVES

SG The only bottle made specifically for lab use, StatGrip™ gallon bottles with HistoFlow™ pouring technology deliver ergonomic handling, smoother dispensing, and smarter storage.

Increase efficiency and storage by up to 45%.
Scan to learn more about StatGrip.

Formalin Fixatives

Formalin, 10% Neutral Buffered

pH 7.0. Ready-to-use buffered formalin.

1 gallon	28600-1	SG
2.5 gallon cubitainer	28600-2.5	
5 gallon cubitainer	28600-5	

Carson/Millonig Formalin, 10% Modified

The Carson Millonig modified buffering formulation preserves tissue specimens for both light and electron microscopy, and can be used in place of traditional 10% NBF.

5 gallon cubitainer	28610-5	
---------------------	---------	--

NBF Clear™

NBF Clear™ is a 10% Neutral Buffered Formalin solution with a specialized buffering system. Replacing standard 10% Neutral Buffered Formalin with NBF Clear™ ensures that your equipment stays clear of clogging precipitants.

1 gallon	0169	SG
----------	------	-----------

Formaldehyde, 37%

Contains methanol as a stabilizer.

1 gallon	28530-1	SG
5 gallon cubitainer	28530-5	
55 gallon drum	28530-55-DRUM	

Zinc Formalin, Buffered

Ready-to-use Zinc Formalin solution. Recommended for use in immunohistochemistry, as zinc formalin preserves more immunoreactivity than standard NBF.

1 gallon	BFZ-1	SG
5 gallon cubitainer	BFZ-5	

Specialty Fixatives

Don't see a speciality fixative you're looking for? Contact us or visit statlab.com

FATTY TISSUE StatFix™

Buffered alcoholic formalin fixative. Particularly well suited for fatty tissues, rapid diagnostic applications and routine frozen sections.

1 gallon	SF-1	SG
----------	------	----

LYMPH Dissect Aid™

Excellent for the detection of lymph nodes; dramatically improves lymph node recovery/harvesting, and also an excellent fixative for fatty tissues. This formulation has helped in diagnosis for the past 30 years.

1 gallon	9001-1	SG
2.5 gallon cube	9001-2.5	
5 gallon cube	9001-5	

FATTY TISSUE RapidFix™

Buffered formalin fixative for use at the grossing station. Fixes approximately 50% faster than 10% NBF, yet safe enough for use on all tissue specimens. Compatible with all other primary fixatives with no interference with any special stain or IHC procedures.

1 gallon	0172	SG
5 gallon cube	0175	

LYMPH B-Plus™ Fix

B-Plus Fix is a proprietary fixative that is excellent for bone marrow and lymph node biopsies, and is a safe and excellent alternative to mercury-based fixatives. New prefill sizes now available.

1 liter	BFIX-32	
1 gallon	BFIX-1	SG

Formalin Alternatives

GREEN ExCell Plus™

ExCell Plus™ is a tissue fixative is a low-hazard alternative to 10% formalin. But now, it is the only tissue fixative that actually smells pleasant! ExCell Plus™ contains No Heavy Metals, and penetrates most tissue specimens as fast as 10% Formalin.

1 liter	FXEXPLT	
1 gallon	FXEXPGAL	SG

GREEN GTF™ Formalin Substitute

A glyoxyl based, formalin-free fixative that is excellent for conventional histology, special stains and immunohistochemistry. Our formaldehyde-free solution provides the morphological detail of a standard aldehyde fixative while preserving high levels of immunoreactivity.

1 gallon	FS-1	SG
----------	------	----

Precipitant-free

Keep your processors in good working order and free from clogs.

PureFix™

PureFix™, 10% Non-Buffered Formalin is preferred by some labs. Will not produce salt precipitates that may obstruct tissue processor lines.

5 gallon cubitainer	3180-5	
---------------------	--------	--

TRANSPORT KITS & SLIDE MAILERS

StatLab manufactures many commonly-used biopsy kits and offers a variety of slide and block mailing options.

StatLab's dedicated kitting department can handle any of your custom kitting needs. Connect with your representative for customized collection kit options.

Urine Collection & Transport Kits

Urine Cytology Collection and Transport Kit

PREFILL

TRANSPORT BAG

COLLECTION JAR

Convenient method for collection, preservation, and transport of urine cytology specimens. For urine cytological testing, kit contains prefilled fixative jar, sterile 120 mL urine collection jar, and a biohazard transport bag.

Kit sold individually

UCK-TP

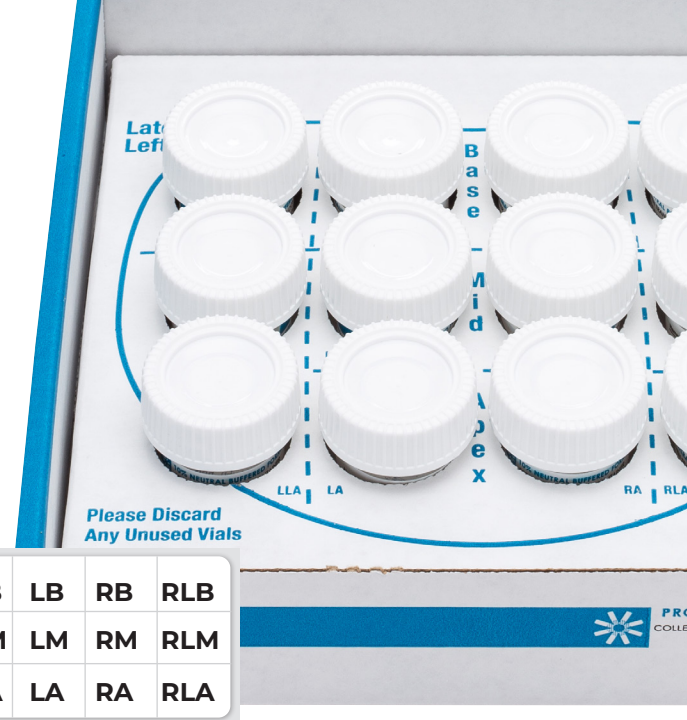

Prostate Biopsy Kits

In addition to standard biopsy kits, StatLab has expanded kit options to include a variety of components to meet your needs.

StatLab prostate biopsy kits include:

- ✔ Pre-labeled positions in the box that correlate to the sample area
- ✔ Biopsy location stickers
- ✔ StatClick prefill containers to eliminate leaks

Biopsy Location Stickers, 12-vial Kit

Prostate Biopsy Kit

NBF PREFILLS

Kit is pre-labeled with location diagram. Kits contain prefilled NBF arranged in pre-labeled positions that correlate with the area of the prostate from which sample is taken. Biopsy location stickers included.

20 mL containers, 6 per kit	PBKNB6
20 mL containers, 8 per kit	PBK0507
20 mL containers, 12 per kit	PBKNB12
20 mL containers, 16 per kit	PBKNB16

Prostate Biopsy Kit

PROSTATE FIXATIVE PREFILLS

Kit is pre-labeled with location diagram. Kits contain vials prefilled with Prostate Fixative, arranged in pre-labeled positions that correlate with the area of the prostate from which sample is taken. Biopsy location stickers included.

20 mL containers, 12 per kit	PBKPF12
------------------------------	---------

FIXATION AND SPECIMEN TRANSPORT

Prostate Biopsy Kit with Cassettes

NBF PREFILLS CASSETTES

Kit is pre-labeled with location diagram. Kit contains two 120 mL prefilled NBF containers with biopsy location stickers, a specimen bag, and 12 pre-labeled cassettes.

2, 120mL containers, bag and cassettes	PBKNB2/120/CASS
--	-----------------

SLIDE & BLOCK TRANSPORT

Chipboard Folder 20-Slide

Traditional folder. Design permits easy removal of slides.

12/each SF100/12

Plastic 5-Slide Cytomailer

Rectangular polypropylene design. Hinged flip top.

100/box SM500-100

Plastic 6-Block Mailer

Transport container made especially for paraffin blocks. Sturdy and transparent for easy viewing of contents. Can be used for handling and shipping up to 6 blocks as needed. The attached cover is easy to close securely. Suitable for most tissue and biopsy cassettes.

50/case M477-6

StatMark® Pen

Designed exclusively for lab techs, this original formulation does not dry out, and withstands exposure to common processing chemicals; excellent for both slides and embedding cassettes.

12/box SMP-BK

BEST SELLER!

SPECIMEN BAGS

Make sure your transport bags work for you. High-quality bags stand up to the wear and tear of both standard or overnight shipping. Contact us for logo customization.

Specimen Transport Bags with Tear-Zone

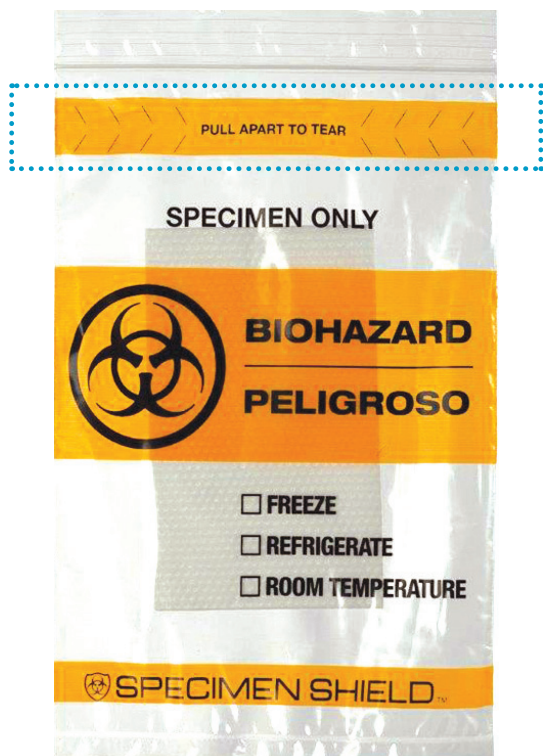

Biohazard symbol displayed on orange or red background. Pocket allows for segregation of paperwork.

6" x 9", zip lock, 1,000/case	BGT0609
8" x 10", zip lock, 1,000/case	BGT0810
12" x 15", zip lock, 500/case	BGT1215
15" x 17", adhesive seal, 500/case	BGT1517

Specimen Transport Bags with Absorbent Sheet

Specimen transport bag with 3 x 5 absorbent sheet inserted. In conformance with IATA and CFR shipping and packaging requirements for diagnostic specimens, sheet absorbs the contents of the specimen container should a leak occur.

6" x 9", zip lock, 1,000/case	BGT0609/WP
8" x 10", zip lock, 1,000/case	BGT0810/WP/1000

The Tear Zone

Preferred in high volume labs, specimen compartment is scored to allow for easy access with just 1 rip.

Destroyable Specimen Transport Bags with Tear-Zone

Destroyable bag with biohazard icon above tear-zone for minimal biohazard waste creation. Specimen compartment is scored

6" x 9", zip lock, 1,000/case	BGT0609/D

BLADE REMOVERS

NEUTRALIZING PRODUCTS

Safely neutralize and dispose of formalin while avoiding the cost of aldehyde waste recycling. StatLab's eco-friendly neutralizing products are the sensible choice for your lab and the environment.

GREEN NeutraGreen™ (Liquid Neutralizer)

Transforms waste formalin into an odorless, 100% non-hazardous material. Comes in liquid form with no powders to mix or dissolve. Waste reaction time of 2-3 hours enables same day disposal. Third-party environmental data confirms NeutraGreen™ will neutralize waste formalin to a material that is non-toxic as well as non-hazardous.

1 gallon, 4/case	1525-1G	SG
2.5 gallon cube	1525-25	
5 gallon cube	1525-18	

GREEN NeutraGreen™ Aldehyde Test Strips

Used to help determine if waste formalin has been safely and effectively neutralized for drain disposal.

50 per bottle	NTS-50
---------------	--------

GREEN NeutraSafe™ (Powdered Neutralizer)

Safely and quickly neutralizes aldehyde solutions for safe drain disposal. Effectively neutralizes in 20-30 minutes. Simply add one bottle of NeutraSafe™ to each gallon of waste formalin solution.

500 mL, 12/case	NS550-12
-----------------	----------

GREEN NeutraSafe™ Aldehyde Test Kit

Kit contains collection vessel, reagent powder packet, and color indicator solution.

25 tests per kit	FTK/25
------------------	--------

Two proprietary formulations are designed to treat and eliminate aldehyde contamination in our municipal water systems.

Both options are effective at treating aldehydes prior to sanitary sewer disposal. Test kits confirm formalin has been neutralized and is safe to pour down the drain.

FormaGuard™ Pads

Dry Mats™ Formalin Neutralizing Pads

Dry Mats™ are a unique solution for aggressive spill response and formalin vapor control. Highly absorbent and dry 12" x 13" sheets contain a proprietary formaldehyde-specific neutralizer. Excellent for grossing stations, countertops, storage cabinets, and any area where formaldehyde spills might occur.

4 packs of 50 mats/case, 200 mats	1728-54
-----------------------------------	---------

BEST SELLER!

Fan Pad-GL™ Formalin Neutralizing Pads

Specially treated pad which absorbs formaldehyde. After absorption, formaldehyde is converted to a non-hazardous polymer, eliminating harmful vapors. Fan Pad minis are also especially useful for cleaning up of small formalin spills.

Mini 11" x 10 3/4", 55/roll, 6 rolls/case	FAN55
Small 6" x 14", 48 pads /case	FAN614
Large 8" x 25", 30 pads /case	FAN825

BEST SELLER!

FormaGuard™ Formalin Neutralizing Pads

FormaGuard™ Pads provide an effective way for lab personnel to guard against formaldehyde vapors and exposure by allowing formalin penetration into a highly absorbent core. The FormaGuard™ Pad is light blue, rigid, polycoated, and roughly 1/8" in thickness.

Small 8" x 11", 25/pack	FGP0811
Medium 11" x 15", 25/pack	FGP1115
Large 15" x 20", 25/pack	FGP1520
Roll, each 13 1/2" X 30'	FGP13530

Fan Pad-GL™ Mini

Polyform-F™

Spill control for safe and rapid handling of formaldehyde vapors. Formaldehyde is neutralized and irreversibly polymerized leaving a non-hazardous biodegradable polymer.

1 gallon	PF04
----------	------

Transform Neutralizing Crystals

10% Formalin Neutralization. Each easy-to-use packet will neutralize one gallon of 10% Formalin into a non-hazardous, neutral pH, clear liquid in minutes.

Transform Crystals, 10 packs/case	CWTFRC5
-----------------------------------	---------

Transform Neutralizing Spray

Formulated for personal use in grossing rooms, autopsy rooms, surgical suites, or anywhere else 10% Formalin is used. Transform™ Spray destroys formalin and its fumes in seconds.

Transform Spray, 1 pint, Each	CWTFSP1
-------------------------------	---------

Transform Neutralizing Pellets

Formulated to absorb and neutralize 10% Formalin spills in seconds.

Transform Pellets 5lbs, Each	CWTFSA5LB
------------------------------	-----------

Set of 1	SL669
Dye rack only	SL667

Original flip top design and proprietary formulation designed to eliminate evaporation and sludgy dyes, with fewer drips and spills.

Tissue Marking Dyes

Permanent tissue marking dyes. Seven colors formulated to define margins without bleeding or fading. Durable, bright dyes hold permanently through processing and staining procedures. Unique lids may either be completely removed or conveniently flipped open to prevent drying.

2 oz bottles fit the StatLab dye rack

ColorBond™ Tissue Marking Dye Mordant

A specially formulated mordant solution that facilitates marking dye adherence to tissue and helps to prevent bleeding or fading of dyes. Particularly helpful with fatty tissue.

8 oz bottle, 6/case CBM-6

Wooden Tip Applicator Stick

6" tapered wooden applicator for tissue marking dyes.

1,000/box 826-W

Cotton Tip Applicator Stick

6" non-sterile, splinter-free applicator stick with cotton tip. For application of tissue marking dyes and other routine uses in paraffin and frozen sectioning.

1,000/box CTA-806W

India Ink

For marking pathology specimens.

25mL STIIN25

1 Pint STIINPT

BLADES & HANDLES

StatLab helps you accurately and efficiently dissect tissue and conduct autopsies with high-quality grossing blades and surgical knives.

#4 Cincinnati Handle
Fits #22 blades

#8 Cincinnati Handle
Fits #60 & #70 blades

#8 Thin Cincinnati Handle
Fits #60 & #70 blades

#22 Cincinnati Blade #70 Cincinnati #60 Cincinnati Blade

Cincinnati Surgical Blades

Precision carbon blades manufactured of high-grade surgical steel resulting in exceptional durability and sharpness. Blades are packaged 100 per box, non-sterile and individually wrapped.

#22, 100/box	CS-B22
#60, 100/box BEST SELLER!	CS-B60
#60, 100/box (wrapped in sets of 5 in poly strips);	CS-B60DE
#70 round tip, 100/box	CS-B70

Cincinnati Blade Handles

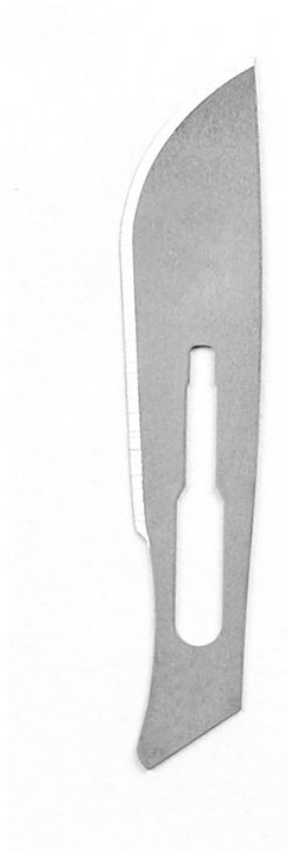

Manufactured from special cold-formed nickel steel. Each handle is designed to incorporate a satin finish, smooth loading and balance. Handles are stainless steel and non-sterile.

#4 handle, fits #22 blades, 1 each	CS-H4
#8 handle, fits #60 & #70 blades, 1 each	CS-H8
#8 thin handle, fits #60 & #70 blades, 1 each	CS-H80

Swan-Morton® Blades

Manufactured from Sheffield Stainless steel. Blades are packaged 100 per box, sterile and individually wrapped.

#22, 100/box	SWM-22
--------------	--------

#6 Bard-Parker® Handle

#22 Bard-Parker® Blade

#8 Bard-Parker® Handle

#60 Bard-Parker® Blade

Bard-Parker® Rib-Back Blades

Offer the superior cutting advantages of carbon steel technology, plus the exclusive Rib-Back™ blade design for greater strength and control. Specially ground and carefully inspected. Packaged 150 per box, non-sterile and individually wrapped.

#22, 150/box	BP1322
#60, 150/box	BP1340

Bard-Parker® Blade Handles

Intended to be used with Bard-Parker® conventional blades. High-impact poly handles are designed for a contoured, firm grip and easy manipulation.

#6 handle (fits BP1322), 1 each	BP1060
#8 handle (fits BP1340), 1 each	BP1080

BLADES & HANDLES

8" Macro-autopsy knife

10" Lung knife

12" Brain knife

Macro-Preparation Knives

A disposable blade with an integral non-slip handle for autopsy and grossing. May be re-sharpened for a longer lasting edge. Each box contains ten knives.

8" Macro-autopsy knife	5000
10" Lung knife	5010
12" Brain knife	5012

Double Edge Grossing Blade and Handle

Sterile Disposable #22 Scalpel

One-piece design incorporates a stainless steel blade on a rigid handle. Each scalpel is supplied with a flexible blade cover for the end user's protection.

10/box	CS-SCLP22
--------	-----------

Double Edge Grossing Blade and Handle

These blades are made exclusively for histological applications. Highly polished and made of carbon steel, they come individually packaged for safer dispensing. Blades measure 2 1/4 x 3/4. The blades can be securely locked into position with a simple twist of the blade handle.

100/box	DEB-0200
1 each	DEB-H

Persona Single Edge Blades

Commonly used for grossing, these single-edge blades are made of coated stainless steel and feature an aluminum back for added stability while grossing. Blades measure 2 1/4" x 1/2".

250/box	74-0014/250
---------	-------------

SAFETY-FIRST

Designed for the safety of lab techs, these blades dispense efficiently, safely and used blades are discarded directly back into the dispenser.

FORCEPS

Comfortably complete the most intricate work with StatLab's ergonomically designed forceps.

TECH-FRIENDLY

Ergonomic, stainless steel, allowing for less stress to be placed on the hands. A solution for tired hands!

Stainless Steel Histology Forceps

The outstanding ergonomic design fits comfortably into all hands with perfect functionality. These forceps are ultra light, non-slip and have a high precision finish.

Sterile Stainless Steel Forceps

Cost-effective pre-sterilized stainless steel forceps. Reduce exposure to infectious disease with disposable instruments. Sturdy 4.5" long stainless steel. Individually wrapped sterile packets.

Sterile Forceps, 25/box	900
Sterile Forceps, 100 forceps/box	900-100

BLADE ACCESSORIES

Aunex Blade Remover

The Aunex one-handed blade removal system allows you to simply push and pull to remove scalpel blades without forceps or fingers. It is the first blade remover to remove larger Pathology & Autopsy blades, such as the #60, and #70 blades, in addition to standard blades sizes of #11-#26. Holds up to 200 blades.

1 each	48CS-EA
--------	---------

Blade Remover

Convenient method for removal of #22 scalpel blades. Insert blade and handle into the slot, press and pull. Blade falls safely into a compartment that stores up to 100 blades. Sold individually.

1 each	SL92500
--------	---------

Sharps Containers

For the safe containment and disposal of used microtome blades, scalpel blades, slides, cover glass, or other medical waste. Made of high density polyethylene plastic. Attached lid prevents loss and forms a leak-proof seal when securely attached. OSHA Compliant.

1.5 quart capacity, each	SHRP-1.5QT
1 gallon capacity, each	SHRP-1GAL
2 gallon capacity, each	SHRP-2GAL

AUTOPSY, DISSECTION AND CROSSING

DECALCIFERS AND SOFTENERS

StatLab decalcifiers are available in a variety of formulations and strengths for every scenario in the lab.

Developed in 1957, these are the first commercially prepared bone decalcifiers made available to pathology laboratories. Many knock offs have been made since then, but the originals remain the industry standard.

Tips for decalcification:
www.statlab.com/news/optimizing-bone-decalcification

Description	Item Number	For H&E / Special Stains	For IHC	Extra Strength/Fast (Higher % of Acid)
Decal (Hydrochloric Acid)	1211	✓		
Decal Stat (Hydrochloric Acid)	1212	✓		✓
Nitrical (Nitric Acid)	1213	✓		✓
Formical 2000 (Formic Acid)	1314	✓	✓	✓
Formical 4 (Formic Acid with 10% NBF)	1214	✓	✓	
Immunocal (Formic Acid)	1214		✓	
RapidCal Immuno (Formic Acid)	6086		✓	✓
Versenate	DCVER	✓	✓	

Decal™ Decalcifier

Since 1957 Original Decal® has been the industry standard. A gentle decalcifier formulated from semiconductor grade hydrochloric acid, EDTA, and highly purified reagent grade water. Can be used to safely decalcify all types of tissue samples from needle biopsies to cortical bone. It's mild enough that most samples can be left in overnight; over-decalcification is not a worry.

32 oz	1211-32	
1 gallon	1211-1	5G
5 gallon cube	1211-5	

Decal Stat™ Decalcifier

Formulated to work faster than Original Decal®. Can be used on all types of calcified tissue but is especially popular for use on bone marrow samples. Decalcifies the average bone marrow biopsy in less than one hour. Sections will cut beautifully and all types of routine and special stains work flawlessly. Cellular and nuclear details remain crisp and clear.

32 oz	1212-32	
1 gallon	1212-1	5G
5 gallon cube	1212-5	

IDEAL FOR NAILS

Try this exclusive formulation designed for pre-processing nail preparation. Fast, efficient, and ready to use, with two concentrations available.

Nail Prep™ Solution

Use pre-processing. The solution softens brittle nail clippings. Nail Prep™ makes specimens easier to cut and process, and helps prevent tissue wash.

500 mL	NP-500
--------	--------

Nail Prep™ Elite (rapid)

Use pre-processing. A higher concentration solution works quickly to soften brittle nail clippings. Results can be seen in as little as 15 minutes.

1 gallon	NPE-1	SG
----------	-------	----

IDEAL FOR IHC

Formical-2000™ Decalcifier

A fast yet gentle bone decalcifier that has been formulated from semiconductor grade formic acid, highly purified reagent grade water and EDTA. Formical-2000™ works well not only as a general purpose decalcifier for all routine histological specimens, it works especially well to decalcify tissue for immunohistochemistry. Will safely decalcify bone without destroying antigen sites.

32 oz	1314-32	
1 gallon	1314-1	SG
5 gallon cube	1314-5	

IDEAL FOR IHC

Formical-4™ Decalcifier

Fixative decalcifier can save time. Fresh tissue can be placed directly into Formical-4™ to fix and decalcify simultaneously. Formulated for use on large dense samples that normally take several days to decalcify. In most cases, poor decalcification is due to poor fixation as large, dense bone usually does not fix properly. As Formical-4™ begins to decalcify large specimens, it allows better penetration of formaldehyde. Therefore, cortical bone, femoral heads, and teeth will not only decalcify better, they will fix better. Formical-4 has also proven to be a smart choice for IHC and ISH.

32 oz	1214-32	
1 gallon	1214-1	SG
5 gallon cube	1214-5	

IDEAL FOR IHC

Immunocal™ Decalcifier

Very mild formic acid decalcifier formulated from semiconductor grade formic acid and highly purified reagent grade water. Ideal for decalcifying bone for immunohistochemistry. Will not destroy antigen sites during decalcification and can safely be used to demonstrate antigens in decalcified bone.

32 oz	1414-32	
1 gallon	1414-1	SG

IDEAL FOR IHC

RapidCal Immuno

Formulated to decalcify bone rapidly, yet perform gently enough to be used as a routine decalcifying solution for bone marrow biopsies. Designed to preserve maximum immunogenicity while accomplishing rapid decalcification.

1 pint	6086	
1 gallon	6089	SG

Nitrical™ Decalcifier

Safe and gentle standard AFIP formulation. Made from semiconductor grade acid and highly purified reagent grade water. Excellent decalcifier for busy laboratories where time is a critical element. Very mild solution that works rapidly with beautiful results. Can be used for all types of specimens from bone marrow to cortical bone.

32 oz	1213-32
-------	---------

Versenate Decal Solution

A non-aggressive chelating bone decalcifier which allows extensive use of special stains and immunohistochemical techniques.

PathFlow PiSmart Cassettes

Made from acetal polymer specifically validated for the PiSmart Cassette Printer. Featuring four patented raised pips in the corners of each print face to protect printed surface during dewaxing, while enabling the surface to be cleared of wax. *Made by StatLab in the USA.*

All PiSmart cassettes are packaged 2,000 per case (2 boxes of 1,000), threaded in strips of 40.

BIOPSY BAGS, WRAPS & PADS

Get added security for your smallest tissue samples. StatLab offers a selection of products that protect small tissue while allowing for the ample flow of processing fluids.

Foam Biopsy Sponges

Blue, black and white foam pads that secure small specimens during processing. 1"x1¹/₄".

Blue, 1,000/case	SL30B/T
White, 1,000/case	SL30W
Black, 1,000/case	SL30BK

Bio-Mesh™ Biopsy Bags

Secures small biopsies during processing. Synthetic mesh, small pore design, ensures unrestricted flow of processing reagents around specimens. Resistant to solvents and acids. 1,000 bags per case.

Small, 30 mm x 45 mm	BBSM1000
Medium, 45 mm x 75 mm	BBMD1000

Biopsy Wraps

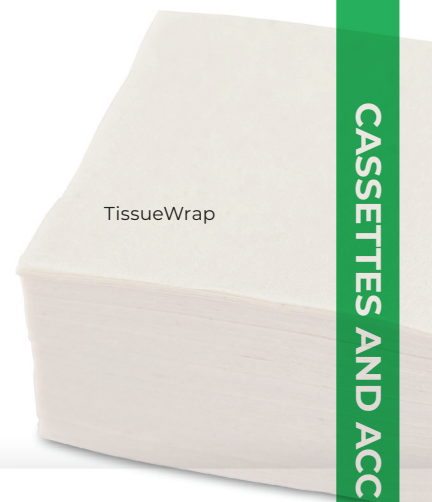

2" x 3", solvent-resistant, thin biopsy paper. Protects biopsy and while allowing for optimal infiltration and fluid exchange.

White, 1,000/box	BS-2X3/W
Pink, 1,000/box	BS-2X3/P

TissueWrap

TissueWrap Biopsy Paper is specifically designed for processing biopsy specimens. The tissue paper is cut to a convenient 60x60mm, ready-to-use size. This non-absorbent paper allows fluids to flow through freely while retaining small tissue fragments.

500/pack	EBB-0102-10A
----------	--------------

Marking Accessories

StatMark® Pen

Designed exclusively for lab techs, this original formulation does not dry out, and withstands exposure to common processing chemicals; excellent for both slides and embedding cassettes.

12/box	SMP-BK
--------	--------

Cyt-o-Dot Pens

Cyt-o-dot cytology pens are designed for ink application on glass slides and coverslips after staining. Durable, acrylic fiber nib is beveled to a precise, fine point. The ink line or 'dot' applied is the ideal size for microscopic visualization. Fine tip cytology markers are permanent, waterproof, and write on almost any surface including glass, plastic, ceramic and metal.

BASE MOLDS

DEHYDRANTS

You can trust that your lab will have the highest quality products to ensure optimal processing and staining.

Plus™ Alcohol 100%

Plus™ Alcohol is a custom isopropyl and methanol blend and can be used as a substitute for traditional ethanol-based alcohol blends. Does not over-dehydrate small specimens and is an excellent dehydrant for both small and large tissue specimens. May also be used in staining procedures.

1 gallon (4/case)	7100-1	SG
-------------------	--------	----

Plus™ Alcohol 95%

Plus™ Alcohol 100% with 5 parts deionized water.

1 gallon (4/case)	7095-1	SG
-------------------	--------	----

Methanol

99% absolute. For general tissue processing as a substitute for ethanol or as a cytology fixative.

1 gallon (4/case)	40380-1	SG
-------------------	---------	----

Isopropyl Alcohol

99% absolute. Ideal for small tissue, biopsy, and microwave processing.

1 gallon (4/case)	36420-1	SG
55 gallon (1 Drum)	36420-55

IMAGER-FRIENDLY

Optimized for use with cytology imaging systems, these alcohols utilize an ultra-pure Type 1 water in their formulation, which is specified by equipment manufacturers that require precise reagent blends.

70% & 50% Reagent Alcohol with Ultrapure Water blend

Also performs well in all standard laboratory applications.

70%, 1 gallon (4/case)	7070-1	SG
50%, 1 gallon (4/case)	7050-1	SG

CLEARING AGENTS

Whether you use xylene or a xylene substitute, StatLab's high-quality clearing agents will help you prepare your tissue for infiltration.

Xylene

ESSENTIALS

Xylene, Laboratory Grade

Purified and filtered to deliver a high quality, consistent product. High solvency factor ensures quick and complete clearing. Free of impurities and water.

1 gallon (4/case)

8400-1

Xylene Substitutes

Citra-Clear™ Xylene Substitute

100% d-Limonene for processing and staining. Mild citrus odor. Exceptionally high purity. Flash point 122°F.

1 gallon (4/case)

6400-1

XS-3™ Xylene Substitute

100% aliphatic hydrocarbon for processing and staining. Higher permissible exposure limit than xylene. Virtually no odor. Flash point 104°F. Exceptionally high purity.

1 gallon (4/case)

7400-1

TISSUE PROCESSING AND EMBEDDING

PARAFFIN

55°-57° MELTING POINT

ParaPro™ XLT

A superior mixture of waxes and copolymer alloys, ParaPro™ XLT is our signature paraffin in the ParaPro™ line. A medium/hard paraffin. For infiltration and embedding. ParaPro™ XLT produces ultra-thin compression-free ribbons and can be used to cut 2-micron sections without icing. Provides excellent support for all types of tissue samples while maintaining exceptional clarity.

0.8 kg bag, 10/case	PPXLT
---------------------	-------

54°-56° MELTING POINT

ParaPro™ SEM

ParaPro™ Standard Embedding Media. A softer paraffin. For infiltration and embedding. This ParaPro™ formulation consists of a low polymer count, which improves infiltration and embedding and leads to more efficient deparaffinization. Minimizes wrinkles.

0.8 kg bag, 10/case	PPSEM
---------------------	-------

50°-54° MELTING POINT

ParaPro™ LMP

ParaPro™ Low Melting Point. A medium/hard paraffin. For infiltration and embedding. Consists of a specialized blend of low-molecular-weight paraffin and polymers to reduce melting point. This lower melting point protects tissues from excessive temperature during processing.

1 kg bag, 8/case	PPLMP
------------------	-------

50°-54° MELTING POINT

ParaPro™ 360

Appropriate for infiltration and embedding, ideal for standard ribbons down to the thinnest 2-micron sections—all at a low melting point. PP360 is formulated with a proprietary blend of low-molecular-weight paraffin and polymers.

0.8 kg bag, 10/case	PP360
---------------------	-------

54°-57° MELTING POINT

ParaPro™ Blue

Universal infiltration and embedding paraffin composed of light blue pellets. A medium paraffin. The blue color makes it easier to visualize small biopsies after processing. Highly refined with the addition of synthetic polymers, enabling rapid impregnation. Optimized for dermatology and urology specimens.

1 kg bag, 8/case	PPBLU
------------------	-------

Find out which paraffin product is better for you! Request sample paraffin blocks to test in your lab: ProductSupport@StatLab.com

PolyShield®

PolyShield® is a liquid paraffin repellent used as a protective coating on laboratory surfaces that are exposed to paraffin residue. PolyShield® can also be used to clean paraffin that has adhered to lab countertops and equipment. 120mL spray bottles.

6/case PS/6

Para-Trim Paraffin Scraper

Plastic paraffin scraper, perfect for cleaning up lab countertops and equipment.

Sold individually, 1 each PT-SLMP

EMBEDDING ACCESSORIES

Work smarter and more efficiently with StatLab's line of helpful embedding tools.

CUSTOMER-INSPIRED

Designed in partnership with a histotech, the wide base of these proprietary tampers means reduced manual effort and risk for repetitive motion injury. Ergonomic, heavy-duty, tech-friendly, easy and efficient.

Tissue Tamp™ Embedding Tamper Set

Tissue Tamp™ Tamper Set was specially developed for histology lab professionals. The set comes with two ergonomic embedding tampers and an easy-to-use stand that will keep the tampers within reach. Is easily adaptable to any brand of embedding station hot plate.

1 set

TTS-2

TCZ1104PKP

MasterPress Tissue Tamper

Flattening tissue within the base mold couldn't be easier. This tool is made with a comfortable, longer handle that's not only xylene resistant but stays cooler when the base is hot. Round, 1/2 inch.

Round Pink, 2/pack	TCZ1100PKP
Small Pink, 2/pack	TCZ1102PKP
Medium Pink, 2/pack	TCZ1104PKP
Large Pink, 2/pack	TCZ1106PKP

HistoCool™ Tissue Cassette Cooling Trays

Effectively aids in the cooling of tissue blocks. Trays are filled with freezer gel that stays frozen longer: up to 6-8 hours. Simply re-freeze at the end of each day.

20 cassette capacity	SLHC-20
30 cassette capacity	SLHC-30

BASE MOLDS

StatLab offers reusable base molds or a plastic, disposable version for single use.

Metal Base Molds

Fits most standard tissue embedding cassettes. Stainless steel construction provides superior thermal conductivity. The molds have a highly polished surface for easy paraffin block removal and cleaning. The well corners are rounded for effortless tissue block removal and optimal paraffin ribboning. 12 per case.

15 mm x 15 mm x 5 mm	MBM1515
24 mm x 24 mm x 5 mm	MBM2424
30 mm x 24 mm x 5 mm	MBM3024
37 mm x 24 mm x 5 mm	MBM3724

Disposable Base Molds

Clear plastic. Eliminates use of cleaning solvents and release compounds. 500 per case.

24 mm x 24 mm x 5 mm	BM2424
37 mm x 24 mm x 5 mm	BM3724

SupaMega™ Base Molds

Supa Mega™ stainless steel base molds have extra deep side walls which allow paraffin to be decanted into the cassette without the risk of the usual 'leakage' of paraffin. 5/box

Stainless Steel Supa Mega™ Base Mold, 1.4in x 1.4in x 0.4in	GBC-3614-05A
Stainless Steel Supa Mega™ Base Mold, 2.4in x 1.8in x 0.6in	GBC-6014-05A
Stainless Steel Slim Base Mold, 2.4in x 1.8in x 0.3in	GBC-6014-05B
Stainless Steel Mothership Base Mold, 2.4in x 1.8in x 0.3in	GBC-6014-05A

Supa Mega™ Base Mold

Block-Out®

Base mold release compound. Excellent for use as a base mold coating to allow for easy separation of paraffin from the base mold. Helps to prevent paraffin build-up on metal base molds.

150 mL bottle, 1 each	BMR-4
-----------------------	-------

Microtomy

Consistently produce great slides from hard, soft or frozen specimens. Created with the help of working microtomists, StatLab's diverse line of products for both microtomes and cryostats will help you get great results.

MICROTOME BLADES

EMBEDDING MEDIUMS

CRYOSTATS

LAB WIPES & BRUSHES

MICROTOME BLADES

Cost-efficient blades created for stability and durability.

Variety

A variety of blades provide effective options based on your preferences for coatings, strength, sharpness and more. StatCut™ and TruCut™ lines are manufactured in Japan while Opticut™, PolyCut™, and Sapphire are made in the USA.

Durability

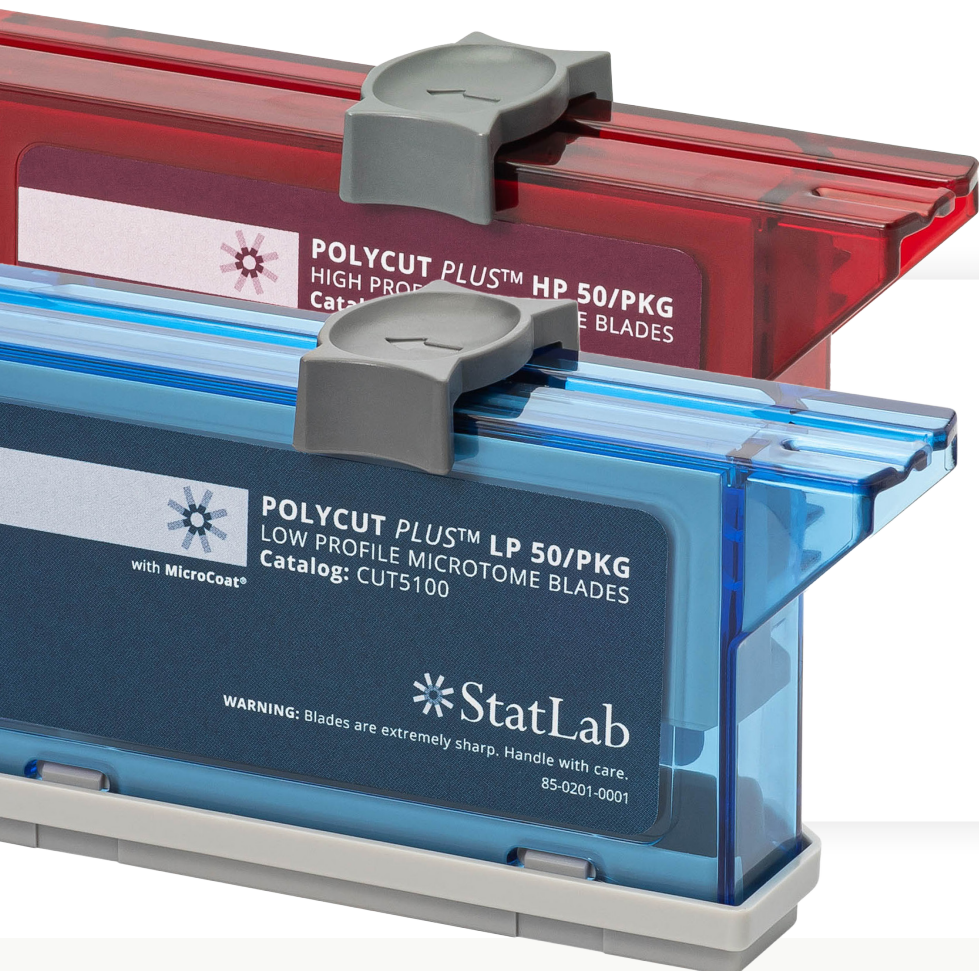

All StatLab blades are developed to be ultra-durable and long-lasting, for fewer changes in your lab, leading to increased efficiency in cost and time.

NEW!

PolyCut Plus™ Microtome Blades

Versatile for all tissue, excelling with tough skin tissue, and have been found to remain durable over time across all tissue and application types. Includes MicroCoat® enrichment technology crafted from medical grade stainless steel overlaid with a series of custom formulated materials to deliver hundreds of cuts per blade while ensuring clear sectioning. Made in the USA.

PolyCut Plus™ Low Profile Blade, 50 blades/pack	CUT5100
PolyCut Plus™ High Profile Blade, 50 blades/pack	CUT5250

Exceptional Durability Over Time

PolyCut Plus™ delivers consistent, high-quality results even after 500 sections—compared to other blades that quickly decline.

**Data from internal testing.*

39.3%

Customers on average use 39.3% fewer blades per year by switching to StatCut.¹

¹StatLab in house data from 2 year customer study

StatCut™ Microtome Blades

Suitable for both soft and hard tissue, StatCut™ Blades are well balanced in durability and sharpness. They are coated for non-stick sections and effortless ribboning.

StatCut™ Low Profile Blade, 50 blades/pack	CUT7900
StatCut™ High Profile Blade, 50 blades/pack	CUT7950

TruCut™ Microtome Blades

TruCut™ Disposable microtome blades demonstrate increased sharpness, and greater durability compared to many conventional microtome blades. Made in Japan with a proprietary surface ionization process, the blade edge is slowly refined, sharpened and optimized in order to maximize hardness, sharpness and durability. 50 blades/pack.

TruCut™ Low Profile, 50 blades/pack	CUT7500
TruCut™ High Profile, 50 blades/pack	CUT7550

MICROTOMY

FROZEN SECTIONING

Compare two choices of frozen section embedding media to determine the one that's best for your lab.

CUSTOMER-FAVORITE

PolarStat Plus™ Embedding Medium for Frozen Sections

Medium Viscosity Formulation especially well suited for Mohs cryostat sectioning. This formulation freezes at optimum cutting temperatures of -10°C and below. No residue is left on slides during the staining procedure, thereby eliminating undesirable background staining.

Set, 12/case	PSP-12
Blue, 1/each	PSP-12B
Green, 1/each	PSP-12G
Red, 1/each	PSP-12R
Yellow, 1/each	PSP-12Y

CUSTOMER-FAVORITE

StatFix™

Buffered alcoholic formalin fixative. Particularly well suited for fatty tissues, rapid diagnostic applications and routine frozen sections.

1 gallon	SF-1
----------	------

PolarStat™ Embedding Medium for Frozen Sections

An aqueous-based frozen section embedding medium designed to support tissue blocks in cryostat sectioning. Formulated to promote rapid freezing, enhanced sectioning and consistent results at a working temperature of -20°C.

4 oz bottle	CRYO-4
-------------	--------

PolarChuck™

PolarChuck™ cryostat embedding chucks are made of anodized aluminum. Patented deep rectangular waffle grid or circular pattern creates a more stable and secure tissue mount. Sold individually.

KT™ Premium Slides NEW!

KT™ Premium Slides deliver proven, superior performance with no background staining and consistent post-staining quality. Manufactured by StatLab in Germany with premium materials and validated across a range of lab equipment, they ensure compatibility and precision.

Explore the data behind KT.
Scan here.

Three Proprietary Formulas

• KT1 Premium Non-Adhesion Slides

Uncoated slides ideal for routine H&E and special stains.

• KT3+ Premium Standard Adhesion Slides

Hydrophobic surface prevents section adherence, causing tissue to jump on the slide; ideal for routine histology, frozen sections, and IHC applications.

• KT5+ Premium Advanced Adhesion Slides

A hybrid slide with superior adhesion and no background staining—even for challenging tissues and harsh chemical processes.

MICROSCOPE SLIDES AND COVERSLIPS

MICROSCOPE SLIDES

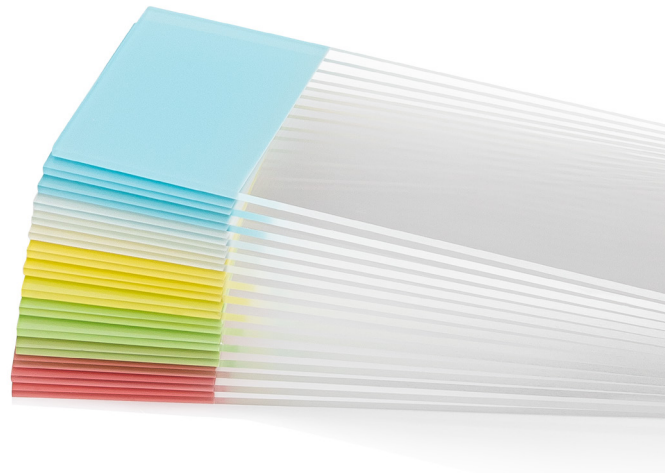

THERMAL TRANSFER COMPATIBLE

Millennia Command™ Adhesion Slides

Strong adhesion meets the rigorous demands of harsh IHC processing, while low background staining makes Millennia Command an excellent choice for special stains and H&E; a true all-purpose slide. Hydrophilic. 75mm X 25mm. 100/box, 10 boxes/ case, sold by the case.

90° Corners

COVERSLIPPING TAPE & MOUNTING MEDIUMS

HOLOGIC VALIDATED

Millennia™ Coverslipping Tape

Millennia™ Coverslipping Tape is an exclusive resin coated, tri-acetate film from StatLab that eliminates the need for glass coverslips. Millennia™ coverslipping film is manufactured using a proprietary micro-diffusion adhesive, which helps to facilitate optimal adhesive dispersion. The film exhibits excellent transparency and optical performance, without the long term formation of bubbles or edge lifting. Each roll is 70 meters in length, 5 rolls per case. Sold by the case. **Validated by Hologic, 2023.**

5 rolls/case M7500

Aging Analysis Summary

Based on the current test results, we can assume that the actual condition of the test system represents or simulates long-term storage under stable conditions of at least 18-20 years. In comparison to the market leading product, the Millennia coverslipping film was stable and performed at levels equivalent to or better than the market-leading product.

Acrymount Plus™

A rapid drying mounting medium/liquid cover glass. Soluble in both xylene and toluene. Compatible with xylene and d-Limonene clearing agents. Slides mounted with Acrymount™ may be screened in as little as 10 minutes.

16oz	SL80PLUS-16
4 oz squeeze bottle, 4/pack	SL80PLUS-4

ClearMount™ Mounting Medium

ClearMount™ is a fast drying mounting medium. It is optically clear as glass and completely neutral. Formulated for automated or manual coverslipping.

480 mL	MMC0143
100 mL	MMC0126

CoverSafe™ Mounting Medium

CoverSafe™ is the first fast-drying, low-hazard, optically clear, permanent mounting medium available for use in Histology and Cytology. CoverSafe™ does not contain Xylene, Toluene, Dioxane, or Benzene.

480 mL	MMC0243
100 mL	MMC0226

COVER GLASS

Made from chemically resistant borosilicate glass, StatLab's high-quality cover glass is especially well-suited for use in automatic coverslippers. Use StatLab mounting medium for optimal results.

KT™ Premium Koverglass

Experience superior optical clarity ideal for microscopy and digital pathology. Made by StatLab in Germany, these coverslips offer Class 1 chemical resistance and preserve integrity for over 20 years of archiving. Precision-cut edges support seamless performance with automatic coverslipping machines, ensuring reliable results every time.

Stains

Give your pathologists the quality and performance they expect. StatLab's stains are made by us in the USA formulated with highest grade, certified raw materials. Quality control ensures longevity and lot-to-lot consistency through functionality testing, as well as analytical, qualitative and quantitative analysis of every lot.

H&E PREMIUM STAINS

Delivering precise, high-quality results with innovative formulations. Engineered for superior nuclear chromatin delineation, optimal cellular contrast, and vibrant cytoplasmic staining, these stains require no filtering and minimize mucin interference.

Take a step toward better results today with the free StatLab Stain Optimization Program.

Maintain both precision in your results and the preferences of your pathologist with a risk-free opportunity to improve your H&E stains and your workflow. Our experts will collect sample slides, develop tailored staining options, and deliver results for review, ensuring optimal quality and complete satisfaction.

Reach out to your sales rep or visit statlab.com/stainprogram to request a Stain Optimization Kit.

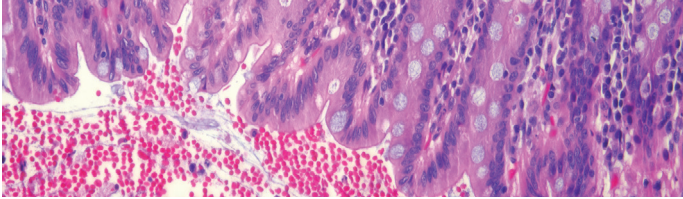

Choose the right H&E premium stain for you.

	Similar Stain	Delineation	Mucin	Application	Filtering
Vintage	Richard Allen 7211	Nuclear chromatin delineation	Mucin staining	Histology and cytology	No daily filtering required
Reserve	Proprietary, only from StatLab	Best for nuclear clarity	Does not stain mucin	Histology and cytology	No daily filtering required
Select	Leica SelectTech	Nuclear chromatin delineation	Minimal mucin staining	H&E, IHC counterstain, or frozens	No daily filtering required

Vintage Stain Line

CUSTOMER-FAVORITE

An excellent, cost-effective hybrid stain solution. These stains, effective for both cytology and histology, need no filtering and deliver unsurpassed nuclear chromatin delineation. Use for mucin staining.

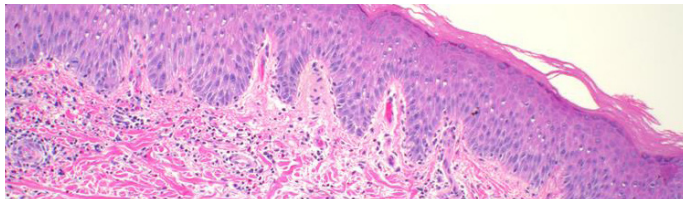

Vintage	500mL	Gallon
Vintage Hematoxylin	SL100	SL100-1
Vintage Plus Hematoxylin	SL106	
High Def Acid Rinse 3.5%		SL103
High Def Acid Rinse 1%		SL205
Vintage Eosin-Y	SL101	SL101-1
Vintage Bluing Reagent *		SL102

*Scotts Tap Water Bluing Substitute

Reserve Stain Line

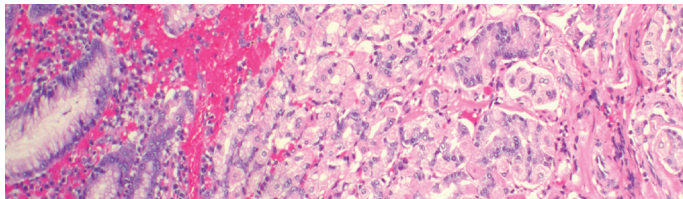

The most distinct and cellular-specific stains available. Reserve Hematoxylin is uniquely engineered to only stain in the nuclear chromatin. No mucin staining is seen. Reserve stains can last 3,500 slides before losing intensity.

Reserve	500mL	Gallon
Reserve Hematoxylin	SL200	
High Def Acid Rinse 3.5%		SL103
High Def Acid Rinse 1%		SL205
Reserve Eosin Multichrome	SL201	
Reserve Bluing Reagent		SL203

Select Stain Line

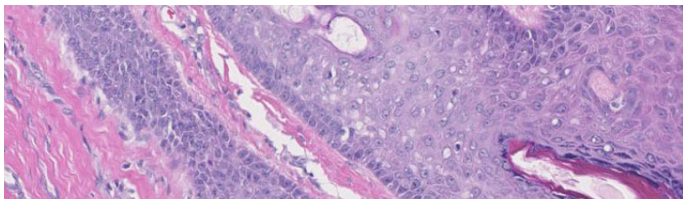

Distinctly stains nuclear chromatin and contains raw materials that are specific to certain proteins. Select Eosin has unique chemical properties, including pH, and effectively complements Select Hematoxylin to provide the best possible cellular contrast.

Select	500mL	Gallon
Select Hematoxylin	SL401	
Select Acid Rinse		SL404
Select Eosin	SL402	SL406
Select Bluing Reagent		SL403

ClearView Stain Line

Quickly deliver consistent results to support rapid diagnosis. Produces excellent staining of both small and large sections, and brilliant stains of nuclei and cytoplasm of cells. Produces no mucin staining.

ClearView	500mL	Gallon
ClearView Hematoxylin	MA0101010	
High Def Acid Rinse 3.5%		SL103
High Def Acid Rinse 1%		SL205
ClearView Eosin Multichrome	MA0101015	
Vintage Bluing Reagent		SL102

H&E CLASSIC STAINS

Before hybrid stains, there was Harris and Gill. If you prefer one of these classic options, StatLab's line of high-quality classic stains are exactly what the doctor ordered.

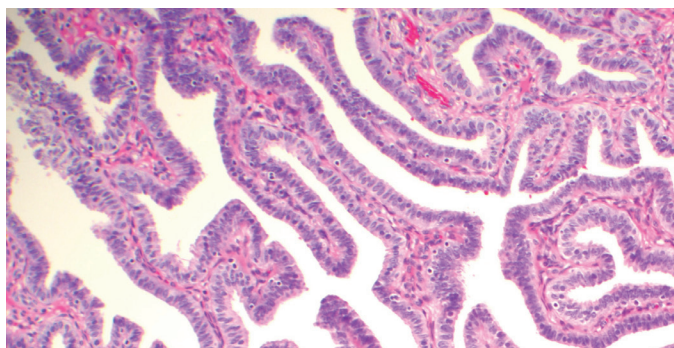

Choose the right H&E classic stain for you.

	Features	Application	Specialty
Harris	Classic formulation	Routine histology	Distinct nuclear detail
Gill 1	Low dye concentration	Cytology or frozens	IHC counterstain
Gill 2	Medium dye concentration	Cytology or histology	Shorter staining time
Gill 3	High dye concentration	Routine histology	Rapid nuclear stain
Mayer's	No differentiation or bluing required	Special Stains counterstain	IHC counterstain

Classic Stain Line

	500mL	Gallon	
Harris Hematoxylin	SL90-16	SL90-1	SG
Gill 1 Hematoxylin	SL97-16	SL97-1	SG
Gill 2 Hematoxylin	SL94-16	SL94-1	SG
Gill 3 Hematoxylin	SL95-16	SL95-1	SG
Treosin™	SL93-16	SL93-1	SG
Eosin-Y, Alcoholic	SL98-16	SL98-1	SG
Eosin with Phloxine B	SL104

Fontana Masson Silver Method

NEW!

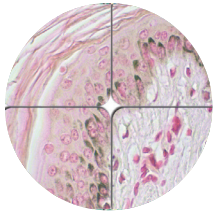

For Argentaffin Granules Stains for argentaffin cells, granules, carcinoid tumors, & melanin

	4oz Kit	8oz Kit
Item Number	K012-4OZ	K012-8OZ
Includes Components	4oz Kit	8oz Kit
Silver Nitrate Solution Fontana	s181S	s181S
Gold Chloride 0.2% Aqueous	s202	s202
Sodium Thiosulfate 5% Aqueous	s1895	s1895
Nuclear Fast Red Kernechtrot 0.1%	248	248

Fontana-Masson Stains

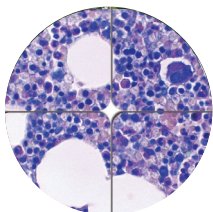

For argentaffin cells, granules, carcinoid tumors, & melanin

	100mL Kit	Pint Kit
Item Number	KTFMA	KTFMAPT
Slide Yield	28-48 Slides	50-240 Slides
Includes Components	100mL Kit	Pint Kit
Type 1 Silver Solution	KC398V (5 vials)	KC398K (20 vials)
0.1% Gold Chloride	AHG0226 (100 mL)	AHG0243 (pint)
5% Sodium Thiosulfate	AHS0326 (100 mL)	AHS0343 (pint)
Nuclear Fast Red Stain	STNFR100 (100mL)	STNFRPT (pint)
Compatible Control Slides	CS-MELA/25, CSS0825P	

Giemsa Optimized™ Stains

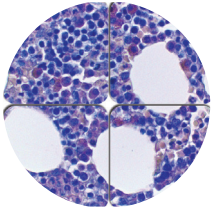

For bone marrow & Helicobacter pylori

	Pint Kit
Item Number	KTOGIPT
Slide Yield	340-620 Slides
Includes Components	Pint Kit
Giemsa Stain Stock	STGIEPT (pint)
Optimized Giemsa Buffer™	BUG1043 (5 pints)
Compatible Control Slides	CSH0125P, CS-HELI/25

Giemsa/May-Grunwald Bone Marrow Stains

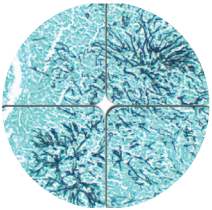

For bone marrow, core sections, mast cells, & Helicobacter pylori

	Pint Kit
Item Number	KTGMGPT
Slide Yield	54 Slides
Includes Components	
Giemsa Stain Stock	STGIEPT (pint)
May-Grunwald Stain Stock	STMGRPT (pint)
6.8pH Phosphate Buffer	BUP1043 (pint)

G.M.S. Stains

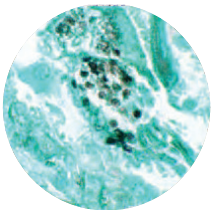

For fungi & Pneumocystis jirovecii

	100mL Kit	Pint Kit
Item Number	KTGMS	KTGMSPT
Slide Yield	20-32 Slides	100-400 Slides
Includes Components		
Methenamine Silver Compound	KT093F (5 vials)	KT093C (20 vials)
5% Chromic Acid	KC0911 (100 mL)	KC0912 (pint)
1% Sodium Bisulfite	KC0941 (100 mL)	KC0942 (pint)
0.3% Gold Chloride	KC0921 (100 mL)	KC0922 (pint)
2% Sodium Thiosulfate	KC0961 (100 mL)	KC0962 (pint)
Light Green Counterstain	STLGC100 (100mL)	STLGCPT (pint)
Compatible Control Slides		
CS-FUNGUS/GMS/25, CS-PNEU/25, CSP0125P		

Gomori's Methenamine Silver Nitrate NEW!

For Fungi & Pneumocystis Carinii Stains

	8oz Kit	Pint Kit
Item Number	K016-8OZ	K016-16OZ
Includes Components		
Chromic Acid 5% Aqueous	s165	s165
Borax 5% Aqueous	s128	s128
Methenamine Silver Nitrate Stock Solution set (A&B)	s240	s240
Sodium Meta-Bisulfite 1% Acq.	s278	s278
Gold Chloride 0.2% Aqueous	s202	s202
Sodium Thiosulfate 2% Aqueous	s280	s280
Fast Green Substitute for Light Green 0.2% Aqueous	s232	s232

Grocott's Method

For Fungi & Pneumocystis Carinii

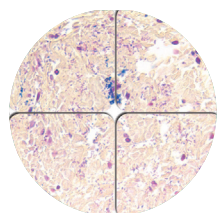

NEW!

	8oz Kit	Pint Kit
Item Number	K022-8OZ	K022-16OZ
Includes Components	8oz Kit	Pint Kit
Chromic Acid 4% Aqueous	s164	s164
Borax 5% Aqueous	s128	s128
Methenamine Silver Nitrate Stock Solution set (A&B)	s240	s240
Sodium Meta-Bisulfite 1% Acq.	s1893	s1893
Gold Chloride 0.1% Aqueous	s201	s201
Sodium Thiosulfate 2% Aqueous	s280	s280
Fast Green Substitute for Light Green 0.2% Aqueous	s232	s232

Gram Mcdonald's™ Stains

For Gram +/- bacteria

	100mL Kit	Pint Kit	Liter Kit
Item Number	KTVEL	KTVELPT	KTVELLT
Slide Yield	36-45 Slides	144-224 Slides	306-450 Slides
Includes Components	100mL Kit	Pint Kit	Liter Kit
5% Alcoholic Hematoxylin	KC2111 (100 mL)	KC2112 (pint)	KC2113 (liter)
10% Ferric Chloride Solution	AHF0126 (100 mL)	AHF0143 (pint)	AHF0150 (liter)
Universal Iodine Solution™	STUIO100 (100 mL)	STUIOPT (pint)	STUIOPT (pint)
Sodium Thiosulfate	AHS0326 (100 mL)	AHS0343 (pint)	AHS0350 (liter)
Van Gieson's Stain	STVGI100 (100 mL)	STVGIPT (pint)	STVGIPT (liter)
Compatible Control Slides			
CS-ELAS/25, CSA0825P			

Brown Hopps Method

For the qualitative demonstration of Gram +/-

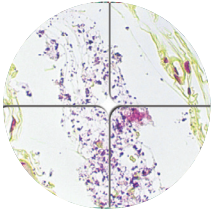

NEW!

	8oz Kit	Pint Kit
Item Number	K005-8OZ	K005-16OZ
Includes Components	8oz Kit	Pint Kit
Crystal Violet 1% Aqueous	s167D	s167D
Gram's Iodine	s204	s204
Basic Fuchsin 0.5% Aqueous	s122	s122
Gallego's Differentiating Solution	s189	s189
Tartrazine 1.5% Aqueous	s284	s284
Cellosolve	s163D	s163D

Brown & Brenn Modified Stains

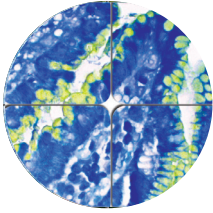

For Gram +/- bacteria

	100mL Kit	Pint Kit
Item Number	KTBBR	KTBBRPT
Slide Yield	36-45 Slides	144-225 Slides
Includes Components	100mL Kit	Pint Kit
Gentian Violet	AHG0426 (100mL)	AHG0443 (pint)
1% Safranin O	STSFO100 (100mL)	STSFOPT (pint)
Universal Iodine Solution™	STUIO100 (100mL)	STUIOPT (pint)
ADVANCED Picric Acid/Acetone	KC0211 (100mL)	KC0212 (pint)
Gram's Decolorizer	AHG0126 (100mL)	AHG0143 (pint)
Compatible Control Slides		
CS-GRAM/25, CSG0225P		

Helico*Stat® Rapid Stains

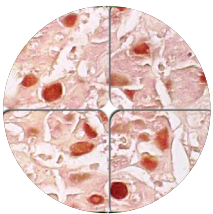

For Helicobacter pylori

	100mL Kit	Pint Kit
Item Number	KTHST	KTHSTPT
Slide Yield	53-66 Slides	211-300 Slides
Includes Components	100mL Kit	Pint Kit
Periodic Acid, 1%	AHP0943 (pint)	AHP0943 (pint)
Alcian Yellow Solution	KC3731 (100 mL)	KC3732 (pint)
3% Sodium Hydroxide	AHS0613 (10 mL)	AHS0619 (pint)
Sodium Metabisulfite Solution	KC3741 (100 mL)	KC3742 (30 mL)
Toluidine Blue Stock	KC372J (100mL)	KC372H (30 mL)
Compatible Control Slides		
CS-HELI/25, CSH0125P		

Hepatitis B Stains

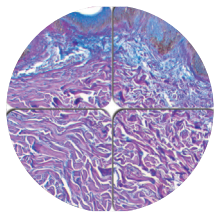

For Hepatitis B surface

	100mL Kit
Item Number	KTHEP
Slide Yield	53-66 Slides
Includes Components	100mL Kit
5% Potassium Permanganate	KC111H (30 mL)
3% Sulfuric Acid	KC115H (30 mL)
2% Oxalic Acid Solution	AHO1126 (100 mL)
Orcein Stain	KC1141 (100 mL)
Differentiating Sol. (Alcohol)	KC1121 (100 mL)
Compatible Control Slides	
CS-HELI/25, CSH0125P	

Herovici's Collagen Stains

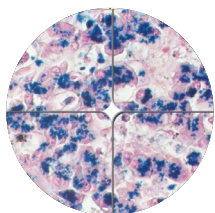

For young & mature collagen

	8oz Kit	Pint Kit
Item Number	KTHER	KTHERPT
Slide Yield	36-45 Slides	144-225 Slides
Includes Components	8oz Kit	Pint Kit
Herovici's Stain Solution A	KC6411 (100 mL)	KC6412 (pint)
Herovici's Stain Solution B	KC6421 (100 mL)	KC6422 (pint)
Weigert's A Hematoxylin	HXWHEA100 (100 mL)	HXWHEAPT (pint)
Weigert's B Hematoxylin	HXWHEB100 (100 mL)	HXWHEBPT (pint)
1% Acetic Acid	AHA0326 (100 mL)	AHA0343 (pint)

Iron Stains

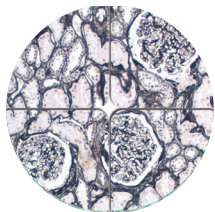

For ferric iron

	100mL Kit	Pint Kit	Gallon Kit
Item Number	KTIRO	KTIROPT	KTIROGAL
Slide Yield	80-100 Slides	320-500 Slides	2,800-3,800 Slides
Includes Components	100mL Kit	Pint Kit	Gallon Kit
3% Potassium Ferrocyanide	AHP0443 (pint)	AHP0443 (2 pints)	AHP0457 (gallon)
3% Hydrochloric Acid	AHH0243 (pint)	AHH0243 (2 pints)	AHH0257 (gallon)
Nuclear Fast Red Stain	STNFR100 (100mL)	STNFRPT (pint)	STNFRGAL (gallon)
Compatible Control Slides	CS-IRON(L)/25, CSF0225P		

Jones With Microwave Procedure

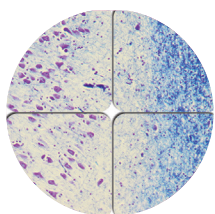

For basement membrane & reticulum fibers

	100mL Kit	Pint Kit
Item Number	KTJON	KTJONPT
Slide Yield	30-112 Slides	50-240 Slides
Includes Components	100mL Kit	Pint Kit
0.5% Periodic Acid	AHP0326 (100 mL)	AHP0343 (pint)
3% Methenamine	AHM0128 (100 mL)	AHM0143 (pint)
5% Silver Nitrate	AHS0426 (100 mL)	AHS0426 (100 mL)
0.2M Boric Acid	KC6241 (100 mL)	KC6241(pint)
0.25M Sodium Borate	KC6251 (100 mL)	KC6251 (100 mL)
0.2% Gold Chloride	AHGCH0.2100	AHGCH0.2PT (pint)
3% Sodium Thiosulfate	KC6271 (100 mL)	KC6272 (pint)
Nuclear Fast Red Stain	STNFR100 (100mL)	STNFRPT (pint)

Luxol Fast Blue Cresyl Echt Violet Stain

For myelin sheaths & nissl substances

	100mL Kit	Pint Kit
Item Number	KTLFB	KTLFBPT
Slide Yield	53-66 Slides	211-330 Slides
Includes Components	100mL Kit	Pint Kit
Luxol Fast Blue Stain	STLFB100 (100mL)	STLFBPT (pint)
Cresyl Echt Violet Stain	AHC0426 (100 mL)	AHC0443 (pint)
70% Reagent Alcohol	ALREA70PT (100mL)	ALREA70PT (2 pints)
0.05% Lithium Carbonate	KC2622 (pint)	KC2622 (2 pints)

Mayer's Mucicarmine Method Stains

NEW!

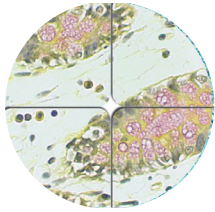

For mucin & cryptococcus

	4oz	8oz Kit	Pint Kit
Item Number	K039-4OZ	K039-8OZ	K039-16OZ
Includes Components	4oz	8oz Kit	Pint Kit
Weigert's Iron Hematoxylin	s216B Solution Set (A & B)	s216B	s216B
Metanil Yellow 0.25% Aqueous	s239	s239	s239
Mayer's Mucicarmine Solution	s246	s246	s246

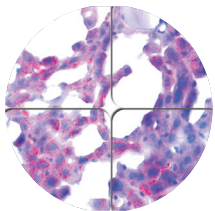

Muci Plus™ Stains

For epithelial mucins

	100mL Kit	Pint Kit
Item Number	KTMLP	KTMLPT
Slide Yield	80-100 Slides	320-500 Slides
Includes Components	100mL Kit	Pint Kit
Muci-10 Plus™	STMLP100 (100mL)	STMLPT (pint)
Modified Mayer's Hematoxylin	HXMMH100 (100mL)	HXMMHPT (pint)
Metanil Yellow Stain	STMYE100 (100mL)	STMYEPT (pint)

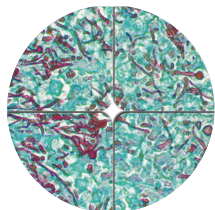

Oil Red O Stains for fat & neutral fats

	100mL Kit	Pint Kit
Item Number	KTORO	KTOROPT
Slide Yield	80-100 Slides	320-500 Slides
Includes Components	100mL Kit	Pint Kit
Propylene Glycol	AHPGLPT (pint)	AHPGLPT (pint)
Oil Red Stain O	STORO100 (100mL)	STOROPT (pint)
Modified Mayer's Hematoxylin	HXMMH100 (100mL)	HXMMHPT (pint)

P.A.S. Stains

For glycogen, mucin, fungi,
& basement membranes

	8oz Kit	Pint Kit	Gallon Kit
Item Number	KTPAS	KTPASPT	KTPASGAL
Slide Yield	80-100 Slides	320-500 Slides	2,800-3,800 Slides
Includes Components	8oz Kit	Pint Kit	Gallon Kit
Optimized Schiff's Solution	33700-16 (pint)	33700-16 (pint)	33700-1000 (liter)
0.5% Periodic Acid Solution	AHP0326 (100 mL)	AHP0343 (pint)	AHP0357 (gallon)
Light Green Counterstain	STLGC100 (100 mL)	STLGCPT (pint)	STLGCAL (gallon)
Modified Mayer's Hematoxylin	HXMMH100 (100 mL)	HXMMHPT (pint)	HXMMHGAL (gallon)
Compatible Control Slides	CS-FUNGUS/PAS/25, CSC0525P		

1% Ready to Use Diastase (P.A.S. Glycogen Digestion)

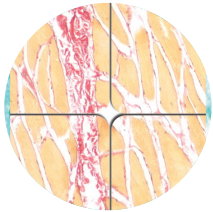

Alpha-amylase determines if glycogen is present in a histology tissue section.

1% Ready to Use

Diastase 250 mL Ready to Use SSC-AAS250

Picro-Sirius Red Stains

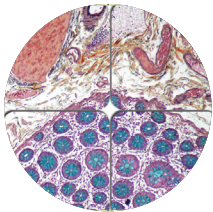

For collagen & muscle

		Pint Kit
Item Number		KTPSRPT
Slide Yield		320-500 Slides
Includes Components		100mL Kit
Picro-Sirius Red Stain		STPSRPT (pint)
0.5% Acetic Acid		KC6712 (2 pints)
Weigert's A Hematoxylin		HXWHEAPT (pint)
Weigert's B Hematoxylin		HXWHEBPT (pint)
Compatible Control Slides		
		CS-IRON(L)/25, CSF0225P

Pentachrome Russell-Movat Stains

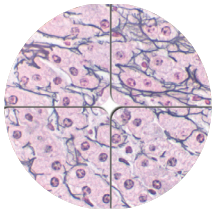

For connective tissue elements, mucins, & nuclei

		100mL Kit	Pint Kit
Item Number		KTRMP	KTRMPPT
Slide Yield		36-45 Slides	144-225 Slides
Includes Components		100mL Kit	Pint Kit
10% Alcoholic Hematoxylin		KC4111 (100 mL)	KC4112 (pint)
Universal Iodine Solution™		STUIO100 (100 mL)	STUIOPT (pint)
5% Sodium Thiosulfate		AHS0326 (100 mL)	AHS0343 (pint)
1% Alcian Blue Solution		KC4171 (100 mL)	KC4172 (pint)
1% Acetic Acid		AHA0326 (200 mL)	AHA0350(liter)
Alcoholic Saffron Solution		KC41A1 (100 mL)	KC41A2 (pint)
10% Ferric Chloride		AHF0126 (100 mL)	AHF0143 (pint)
3% Acetic Acid		AHA0426 (100 mL)	AHA0443 (pint)
2% Ferric Chloride		KC4141 (100 mL)	KC4142 (pint)
Crocein Scarlet-Acid Fuchsin		KC41B1 (100 mL)	KC41B2 (pint)
Phosphotungstic Acid		AHP0626 (200 mL)	AHP0650 (liter)
Compatible Control Slides			
		CSA0825P, CSS0725P, CSC1025P	

Reticulum, Chandler's Precision® Stains

For reticulum fibers with no background staining

		100mL	Pint Kit
Item Number		KTCPR	KTCPRPT
Slide Yield		30-112 Slides	120-480 Slides
Includes Components		100mL	Pint Kit
1% Potassium Permanganate		AHP0726 (100mL)	AHP0743 (pint)
3% Potassium Metabisulfite		KC3921 (100mL)	KC3922 (pint)
3% Ferric Ammonium Sulfate		KC3931 (100mL)	KC3932 (pint)
3% Sodium Hydroxide		AHS0626 (100mL)	AHS0643 (pint)
20% Formalin		KC3941 (100mL)	KC3942 (pint)
0.1% Gold Chloride		AHG0226 (100mL)	AHG0243 (pint)
5% Sodium Thiosulfate		AHS0326 (100mL)	AHS0343 (pint)
Nuclear Fast Red Stain		STNFR100 (100mL)	STNFRPT (pint)
Type 1 Silver Solution		KC398V (5 vials)	KC398K (20 vials total)

Gomori's Method

For reticulum fibers
in tissue

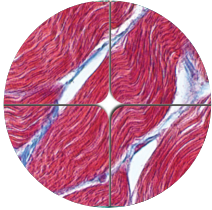

NEW!

		8oz Kit
Item Number		K018-8OZ
Includes Components		
Ammoniacal Silver Nitrate Solution Gomori's		s114
Potassium Permanganate 0.5% Aqueous		s263
Potassium Meta-Bisulfite 2% Aqueous		s2005
Ferric Ammonium Sulfate 2% Aqueous		s179
Formalin 20% Non Buffered		s1807
Sodium Thiosulfate 2% Aqueous		s280
Gold Chloride 0.2% Aqueous		s202

Trichrome, Masson's with microwave procedure

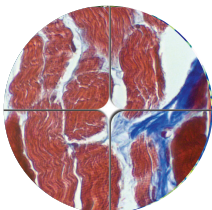

For collagen &
muscleantigen

	100mL Kit	Pint Kit
Item Number	KTMTR	KTMTRPT
Slide Yield	80-100 Slides	320-500 Slides
Includes Components		
Bouins Fluid	FXBOU100 (100 mL)	FXBOUPT (pint)
Biebrich Scarlet/Acid Fuchsin	AHB0426 (100 mL)	AHB0443 (pint)
Phosphomolybdc/Phoshotungstic Acid AHP0526 (100 mL)	AHP0526 (100 mL)	AHP0543 (pint)

SLIDE STAINING ACCESSORIES

Plastic 5-Slide Cytomailer

Rectangular design with hinged flip top, 100/box SM500-100

Trans-Prep™ 5-Slide Jar

Transparent HDPP Leak Proof Jar, 1 each CJ616

Acrylic Slide Drying Rack

10 slots (50 slides), each SL670

Slide Staining 20-Slide Containers

White, 1/each LWS20WH

Green, 1/each LWS20GR

Glass Coplin 5-Slide Jars

90 mm, 6/case 900570

Glass Staining Dish with Cover

118 mm x 88 mm x 70 mm (25-30 slide rack), 1 each 900303EA

Metal Staining 30-Slide Rack

Stainless Steel, 3/case 900234

Filter Paper

20.5 cm, 100/pack 6150-2050

33 cm, 100/pack 6150-3300

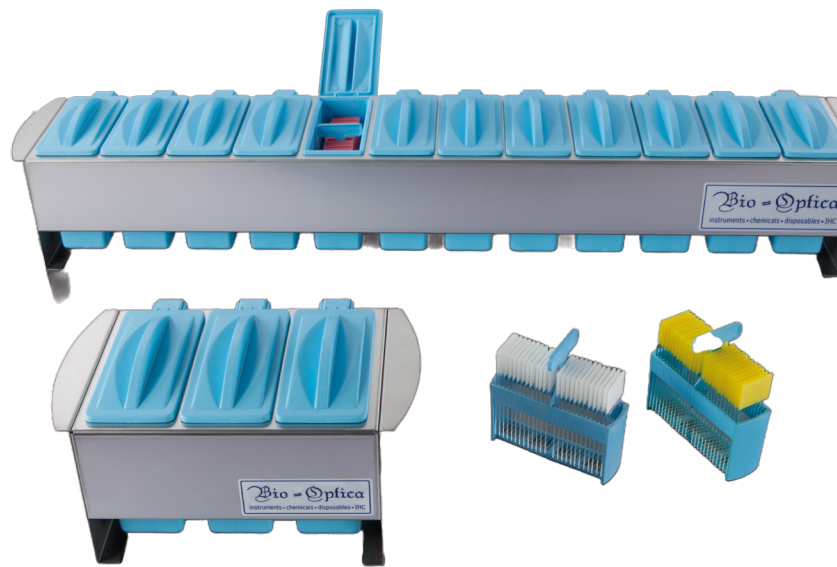

Explore KT™ Premium Adhesion Slides
See page 59

Manual Slide Staining Sets

Acid proof holder, made of stainless steel. Plastic dishes with lid, resistant to alcohol, xylene, toluene and staining solutions. Removable plastic dishes, steel covers.

Stainless steel holder, 12 dishes 300mL, 1/each	10-10
Stainless steel holder, 3 troughs 300mL, 1/each	10-20
Plastic stain rack, 1/each	10-42
Individual plastic dish, 300mL 12/pack	10-30

High Capacity Slide Dryer

Reduce drying time by up to 70% with this circulating air dryer. Designed to give maximum drying capacity for high workload laboratories. Holds up to 390 slides when used without the optional racks, and 240 when used with the rack and timers.

Slide Dryer	SI-SDR-HC
4 Rack Timer Unit (1-4), sold separately	SI-SDR-TMR1
4 Rack Timer Unit (5-8), sold separately	SI-SDR-TMR2
8 Slide Rack Holder, sold separately	SI-SDR-HLDR

Lab Timers and Stopwatches

4-Channel Alarm Timer/Stopwatch, 1 each	EQT641
LabAlert Triple Timer 1 each	HS24490M

Control Slides

Validate the stains you run every day with a wide variety of competitively priced, high-quality control slides.

ANTIBODIES

StatLab offers a wide range of mouse monoclonal, rabbit monoclonal, and rabbit polyclonal RTU (Ready to Use) antibodies.

Antibodies are optimized with StatLab's detection systems for use on formalin-fixed paraffin embedded tissues, frozen sections, and cytological samples.

CYTOLOGY COLLECTION

StatLab offers a line of collection devices so you can conveniently order all your cytology products from one vendor.

StatLab's urine cytology kit is a convenient, economical method for the collection of urine specimens for the diagnosis of urinary infection, disease, and bladder cancer.

Urine Cytology Collection and Transport Kit

Convenient method for the collection, preservation, and transport of urine cytology specimens. For urine cytological testing, kit contains prefilled fixative jar, sterile 120 mL urine collection jar, and a biohazard transport bag.

Kit sold individually

UCK-TP

Urine Cytology Collection and Transport Kit

Cervical Broom

Scored StatPrep Cervical Brush

One-slide Pap Smear Kit

No Touch® pap kit. Kit includes fixative, one frosted slide, one 8" cervical brush, one dual-tip wooden scraper, pump spray fixative pack and detailed instructions for smear collection. Structural support protects slide during transport.

25 kits/box

PK6000

StatPrep Cervical Broom, Sterile

A device designed to gather both endo and ectocervical cells including those in the transformation zone. Unique, softer LDP bristles with slip agent gather full spectrum of cells in a one-step procedure. Sterile, individually packaged.

100/pack

CB400-100

Scored StatPrep Cervical Brush, 8" Sterile

Scored brush intended for use in liquid based cytology endocervical cell collection. Sterile, individually packaged.

100/pack

CB500-100

Cervical Scraper, Plastic, 8"

Dual end plastic cervical scraper. Tapered and Ayres tip.

500/pack

CT1760

StatPrep™ Cytology Collection System

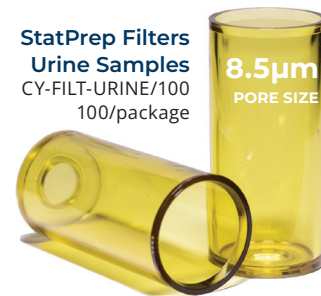

StatPrep™ is a high-quality, cost-saving alternative to brand-name cytology consumables. Compatible with existing systems, it delivers consistent results for gyn, urine, and FNA using ultra-thin membranes for reliable cell capture.

StatPrep Prefills

StatPrep Preserve is used for the preservation and transport of cytology specimens intended for liquid-based cytology processing.

30mL NonGyn Prefills 100/case (4 cartons of 25 vials)	CY50-NONGYN/30ML
20 mL NonGyn Prefills 100/case (4 cartons of 25 vials)	CY50-NONGYN/20ML
20 mL Gyn Prefills 100/case (4 cartons of 25 vials)	CY50-GYN/20ML

StatPrep Adhesion Cyto Slides

Small Circle, 72/box, 17mm circle	CY-SLIDE-SMCIRC
Large Circle Slide, 72/box, 33mm circle	CY-SLIDE-LGCIRC

StatPrep Preserve

StatPrep solution is used for the preservation and transport of cytology specimens intended for liquid-based cytology processing.

32 oz bottle	CY32-NONGYN/32
--------------	----------------

StatPrep CytoLysis Solution

32 oz bottle	CY32-LYSIS/32

Centrifuge Tube CytoLysis Prefill

50 mL centrifuge tube prefilled with 30mL CytoLysis Solution. 100/case.

4 cartons of 25 vials	CY50-LYSIS/30ML
-----------------------	-----------------

CYTOLOGY STAINS AND FIXATIVES

StatLab's cytology stains are made with top-grade, certified raw materials and tested to meet the highest industry standards. Ready-to-use with no dilution needed, they're designed to deliver consistent, high-quality results when used together.

EA-50

Classic formula for routine cytoplasmic staining of gynecological and non-gynecological specimens.

500 mL	SL91-16
1 gallon	SL91-1

Modified EA-50

A popular substitute for EA-65. Contains twice as much Eosin-Y than EA-50 and no Bismark Brown.

1 gallon	SL96-1
----------	--------

EA-65

Alcohol-based, for routine cytoplasmic staining.

500 mL	SL302
--------	-------

TIME SAVER

Reserve Cyto-DX Stain

This easy, one-step cytoplasmic stain saves labor and reagent costs by eliminating multiple steps. Provides familiar color hues associated with cytology smears. Can be used for all gynecological and non-gynecological specimens.

500 mL	SL304
--------	-------

OG-6

A modified formulation used in combination with the EA series to stain keratinized cells in all gynecological and non-gynecological specimens. This formulation eliminates common chemical precipitation associated with traditional OG products.

500 mL	SL92-16
1 gallon	SL92-1

BESTSELLER

Hema-Diff™ Rapid Differential Stains

This three-step kit delivers fast, reliable results in just 30 seconds. Ideal for FNA cytology, blood smears, microbiological organisms, H. pylori, and bone marrow specimens, it's a versatile and economical choice.

Hema-Diff™ Stain Kit

1 Kit, Includes 500ml of Fixative, Xanthene, Thiazine	11970-16
---	----------

Hema-Diff™ Individual Stains

	500mL	Gallon
Hema-Diff #1 Fixative	11985-16	11985-1
Hema-Diff #2 Fixative	11975-16	11975-1
Hema-Diff #3 Fixative	11980-16	11980-1

Cytology Fixatives

Cytology Fixative Spray

Economical, environmentally safe, and effective cell preservation! Natural ethyl alcohol and polyethylene glycol formulation. 4 oz spray, 12/case. Sold by the case.

12/case, 4oz pump	CYCFI4CS
-------------------	----------

Saccomanno Collection Fluid

A ready-to-use fixative used for the collection of sputum. Lyses red blood cells. Mucoproteins remain suspended. Cells from samples are easily concentrated by centrifuging or filtering. Cells display excellent staining characteristics.

PREFILLED CONTAINERS

120 mL vial, 96/case	SL26
----------------------	------

BULK

1 gallon	SL25-1
----------	--------

CytoStat-Red

CytoStat™ Red Collection Fluid is an alcohol-based general purpose fixative solution. CytoStat™ Red is used for diagnostic non-gynecological cytology specimens, which include, but are not limited to, sputum, washings, body fluids, scrapings, and fine needle aspiration biopsies. This fixative lyses red blood cells and solubilizes proteins while preserving the diagnostically relevant cells.

PREFILLED CONTAINERS

120 mL Vial, 96/case	CSR-120mL
----------------------	-----------

BULK

1 Gallon	CSR-1
----------	-------

CytoVial, 95% Alcohol Prefilled Vials

Vials are prefilled with 95% Reagent Alcohol and hold 4 slides. Screw-top caps assure tight fit and leak resistance during transit.

PREFILLED CONTAINERS

50 mL vial, 100/case	CVP-9500/100
----------------------	--------------

50% Reagent Alcohol Vials

A widely used cytology fixative. Vials are prefilled with 60mL of 50% reagent alcohol. Screw top caps ensure tight fit and leak resistance during transit.

PREFILLED CONTAINERS

120 mL vial, 96/case	6950-120ML
----------------------	------------

CytoCell Block

CytoCell Block Fix™ is designed as a fixative for cells from body fluids. Ideal for fine needle aspirations, body cavity fluids, washings, brushings, and gynecologic and non-gynecologic liquid-based specimens. CytoCell Block Fix™ causes precipitation of protein and usually causes trapping of cells within the protein matrix present. Nuclei show crisp nuclear membranes with distinct nucleoli.

PREFILLED CONTAINERS

CENTRIFUGE TUBES & CYTO FUNNELS

StatLab offers a line of centrifuge tubes, cytology funnels, and cytology slides so you can conveniently order all your cytology products from one vendor.

Double Cytology Funnel

Single Cytology Funnel

Centrifuge Tubes

Translucent polypropylene. Screw-on caps provide firm, leak-resistant fit.

50mL non-sterile, 200/case	LX4103
15 mL, 500/case	LX4115
50 mL sterile, 500/case	LX4108

Cytology Funnels

Fully compatible with the Thermo Shandon CytoSpin® Centrifuge. Includes: white filter card and cap.

Single Funnel, 500/case	M964-10FW
Single Funnel, disposable clip, 480/case	M965-10FW
Double Funnel, 500/case	M964-20FW
Double Funnel, disposable clip, 480/case	M965-20FW

Circle Cytology Adhesion Slides

75 mm x 25 mm slides printed with single or double circles on their surface. Each well is placed in the exact position where the centrifuge specimen is deposited. 10 gross/case.

Cytospin slides, Single circle	CSP-1C
Cytospin slides, Double circle	CSP-2C

Pipette Pearl Micro Adjustable

Pearl Adjustable Micro Pipette, single channel, adjustable volume, ergonomic design. 1/each.

Purple, 2-20ul	HS120099
Yellow, 20-200ul	HS120102
Blue, 100-1000ul	HS120104

Pipette Pearl Micro Adjustable 2-20ul

See page 160 for a selection of filtered pipette tips.

CYTOPATH® DISC

The Cytopath disc is an innovative, user-friendly cell block technology engineered for the standardized preparation of cell blocks from a wide range of cytological specimens.

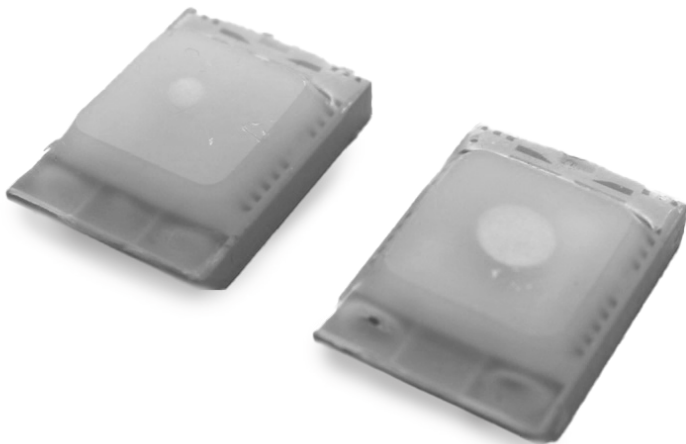

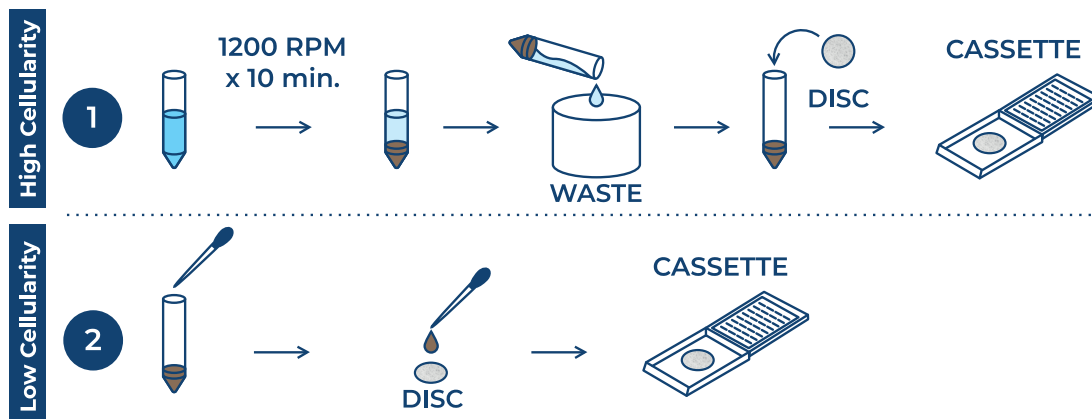

This solution supports consistent pre-analytical processing, enhances specimen quality, and integrates seamlessly into existing laboratory workflows. Compatible with standard fixatives. Patent pending.

NEW!

Disposable, non-sterile. 10 discs/pack.

6mm diameter, 2mm thickness	CPD06
12mm diameter, 2mm thickness	CPD12

Why Cytopath Disc?

- ✓ High definition of cellular morphology
- ✓ No heat-stress for cells
- ✓ Suitable with IHC and molecular tests
- ✓ Ready-to-use, no accessories needed
- ✓ Reagent-free
- ✓ Simultaneous preparation of specimens
- ✓ Individual packaging for a long shelf-life

MICROBIOLOGY SLIDES

NEW!

Tuberculosis (TB) Slides

Locate smears easily and quickly. Non-fluorescing black background increases contrast of fluorescent organisms. 25 x 75 x 1mm thick frosted end with a 21mm well. Minimum order quantity of 5 gross (720 slides). Control cells not included.

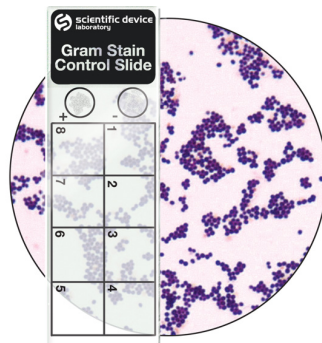

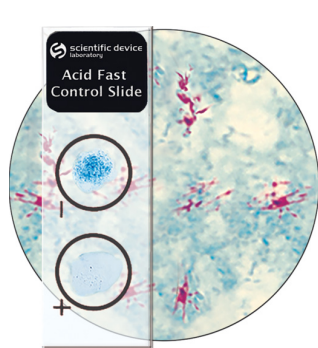

TB Slide Printed	041-0120
------------------	----------

Sterile Slides

Ideal for use in surgical suites, these individually packaged non-adhesion slides eliminate contamination before use. 50/pkg.

Sterile Slide Frosted End	050-S
Sterile Slide White End	050-1S
Sterile Slide Yellow End	050-2S

Control Slides

Saving on time and cost, these control slides eliminate the hassle of maintaining cultures while revealing many visible organisms. Contain both positive and negative wells where relevant. Made to satisfy regulatory requirements.

Acid Fast Stain Control Slides, 50/box	351
Gram Stain Control Slides, 50/box	361
Microsporidia Control Slides, 10/box	369
Cryptosporidium Control Slides, 10/box	369

Tuberculosis (TB) Testing

Compatible with multiple automated TB systems.

NEW!

Snap N' Digest

Ready-to-mix system to process Tuberculosis (TB) and other clinical specimens (sputum, bronchial, tracheal lavage) suspected to contain mycobacteria. Contains crushable NALC ampoules inside a safety straw inside a flexible bottle with alkali solution and TB phosphate buffer packets. Contains NALC ampoule, bottle with alkali solution, and TB Phosphate Buffer packets. Compatible with multiple automated TB systems. Solution in bottle with unbroken ampoule is stable for 1 year without refrigeration. 10 bottles/box.

Snap n' Digest 75ml	667
Snap n' Digest 150ml	668

Auramine O Stain Sets

Cost effective two-minute stain for fluorescent detection of tuberculosis and other Mycobacteria species¹. Organisms are visible at low power for fast scanning and produce little to no background fluorescence. Includes one stain and one decolorizer.

Small Auramine O Set, 1 250mL bottle of each	345-250
Medium Auramine O Set, 4 1L bottles of each	345-04L

Sterile Phosphate Buffer

No weighing, mixing or autoclave time in a ready-to-use single bottle of sterilized buffer solution. For washing sputum after digestion and decontamination.

Phosphate Buffer 100ml, 10 bottles/box	669-100
Phosphate Buffer 500ml, 1 bottle/each	669-500

Shrink Seals

Safely contain pathogenic microorganisms with oxygen permeable shrink seals. Extends shelf life of sensitive plates and dries in under 30 minutes at room temperature. 92X25mm.

NEW!

SHRINK SEALS

Shrink Seal, 400/pkg	261
----------------------	-----

Sterile Instruments

Cost-effective and disposable, designed to minimize contamination. Ideal for dissection of possible infectious material.

NEW!

Sterile Stainless Steel Forceps, 25/box	900
Sterile Stainless Steel Forceps, 100/box	900-100
Sterile Instrument Set, 12 sets/pkg	903
<i>Set contains: 1 forceps 11mm, 1 scalpel, #11 blade, 1 scissor</i>	

Parasitology

NEW!

Pinworm Collector

See ova more precisely with this clear and thinner polystyrene paddle. Each Pinworm Collector has a paddle with one “sticky side” to allow ova to stick to the adhesive. View collection paddle directly on your microscope by simply snapping off top of vial and applying to slide. Paddle then becomes the coverslip.

Pinworm Collector, 25/box	582
---------------------------	-----

Mycology **NEW!**

Retain mycology preparations indefinitely, control for skin scrapings, quickly create slide mounts, and more with a wide portfolio supporting mycology.

MycoPerm Blue

Keep accurate records by retaining mycology preparations indefinitely with MycoPerm-BLUE, a combined stain/fixative. Liquid solution is packaged in a dropper bottle for easy application. Works as both a stain and coverslip.

12mL bottle, 1 each	753
---------------------	-----

KOH Fungal Control

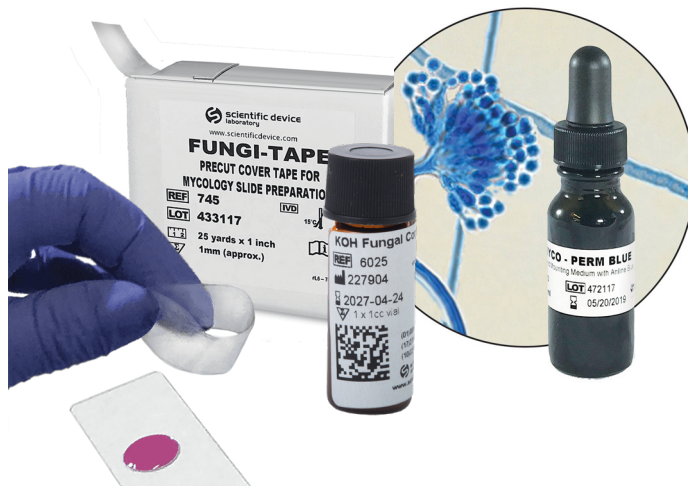

An ideal control for skin scrapings. The 1mL vial is filled with inactivated mycelia and spores of *Aspergillus* sp., along with cellular debris, for quick characterization of specimens. An addition of Methylene blue can be used to help highlight the mycelia.

1cc Vial, 1 each	6025
------------------	------

Fungi-Tape

Adhesive tape for quickly creating slide mounts of fungi from primary cultures. Pliable enough to make a loop and take a sample from your culture. Each roll comes in a dispensing box for easy use and contains enough tape for approximately 360 coverslips.

Fungi-Tape Roll, 1 each	745
-------------------------	-----

Labeling and Tracking Solutions

Complete solutions and equipment designed to promote accuracy and reduce errors to provide the best possible patient care.

PISMART CASSETTE PRINTERS

Boost automation, maximize throughput, and cut down on errors—PiSmart™ cassette printers make smart lab workflows simple.

CUSTOMER-FAVORITE

When you choose StatLab as your printer partner, you're guaranteed peace of mind.

PiSmart printers and cassettes are manufactured by StatLab, delivering a high-quality, integrated and reliable solution designed to simplify lab workflows and ensure consistent supply you can trust.

We're so confident in our products that we'll include 4 years of service, guaranteed

LIS integration, and a lifetime printhead guarantee¹ when you work with us and use PiSmart cassettes. And when you need help, you have access to our expert Service & Support team. We call it the PiSmart promise, delivering guaranteed peace of mind for your PiSmart printer.

FLEXIBLE

Flexible connectivity options that work for any lab workflow.

ACCURATE

User login and tracking creates traceability for root cause analysis.

FAST

A 3-5 second print time so you never have to pause your workflow.

Scan here.

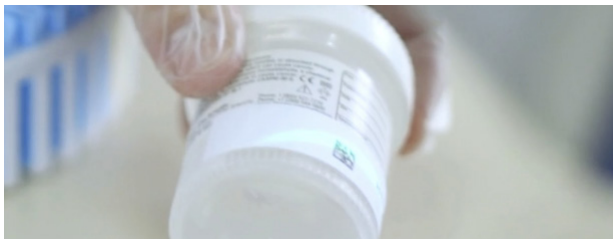

INTEGRATED LABEL DESIGN

Intuitive built-in label design software eliminating the need for separate label software, and allows for easy development and customization of the cassette label's sample information.

FLEXIBLE SOLUTIONS

Ability to easily swap hoppers, as well as bypass the hopper and manually drop in a different type of cassette. Optional cassette collection systems are available in multiple configurations.

BUILT-IN BARCODE SCANNER

A fully integrated barcode scanner eliminates the need for an external scanner and automates data entry; a simple scan can log users in and out of the system or create a new cassette label for printing.

SMALL FOOTPRINT

The small size of the printer allows it to sit on the grossing bench next to the microtome. This increases efficiency and accuracy through on-demand printing.

PISMA RT SLIDE PRINTERS

End-to-end compatibility. The PiSmart™ solution delivers intuitive, built-in software, a simple interface, and excellent connectivity options.

CUSTOMER-FAVORITE

When you choose StatLab as your printer partner, you're guaranteed peace of mind.

PiSmart printers and KT slides are manufactured by StatLab, delivering a high-quality, integrated and reliable solution designed to simplify lab workflows and ensure consistent supply you can trust.

SLIDE LABEL PRINTING

A full line of slide labels that are ideally suited for most histological and cytological staining procedures. These labels are stain and solvent resistant, are available in various dimensions, thicknesses, surface treatments, and are optimized to work with a specific label printer.

All zebra-compatible products are compatible with *all thermal transfer printers*.

GLOSS VS. MATTE LABELS

Gloss

Benefits:

Dark, lasting printing, scratch-proof

Disadvantages:

May smear immediately after printing

Matte

Benefits:

No smudging, scratch-proof

Disadvantages:

Not as dark, tends to fade over time

Zebra Slide Label Kit

Labels and ribbons to get you started quickly.

INCLUDES

- **3 rolls of Slide Labels** (XR140-1A1CP) **.875" X .875"**, 1 across, 1" core perforated Xylene resistant, rounded corners. 1,800/roll, 5,400 labels/kit
- **2 StainSafe Ribbons** (SS-RIBBON-Z) 2.5" x 242' per ribbon, 1/2 inch core

GALILEO SERIES 2 ROTARY MICROTOMES

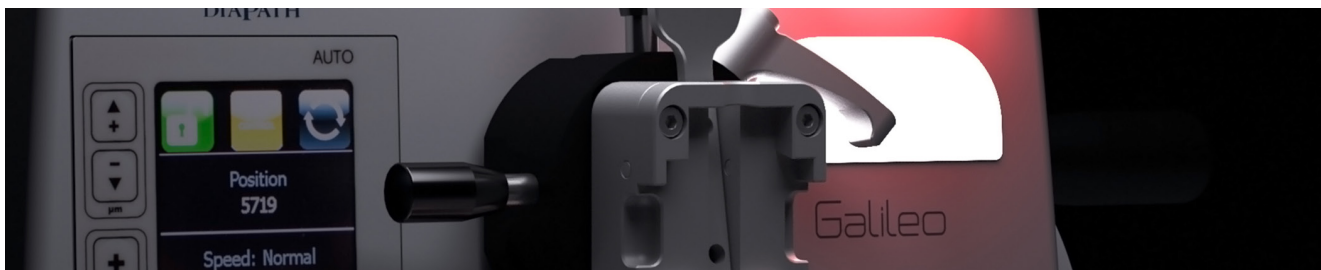

Innovation, reliability and safety in microtomy.
The latest generation of rotary microtomes.

NEW! *Diapath is now part of StatLab. Products available beginning in Q4 2025*

Efficiency and comfort in a single solution.

The Galileo Series 2 rotary microtomes are designed to deliver precision, reliability, and safety in histology tissue sectioning. With both semi-automatic and automatic modes, you can choose the cutting style.

Plus, ergonomic accessories help protect the operator's musculoskeletal health over time. It's a smart, flexible solution built to support lab professionals day after day.

ORIENTATION SYSTEM

Micrometric precision pointing system of the sample with zero position indicator.

CLAMP

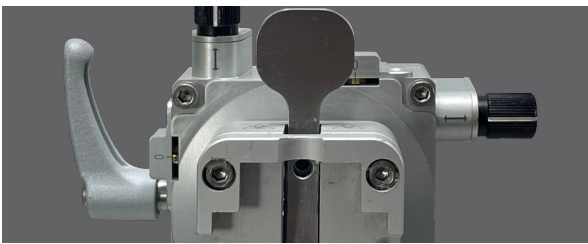

Thanks to the practical quick release system it is possible to easily replace the different types of clamps.

KNIFE HOLDER

Knife holder with millimeter indicator of position and anticut protection, supported by a base for greater stability.

PRECISION ORIENTATION SYSTEM

For a perfect alignment.

DYNAMIC CONTROL PEDAL

Allows cutting in fully automatic mode. This enables you to have your hands free.

BACKLIT PANEL

Immediate evaluation of backlit sections.

HELPFUL HANDWHEEL SYSTEM

Innovative handwheel-assisted rotation reduces strain and effort, improving operator comfort.

DANTE EMBEDDING SYSTEM

A flexible embedding system for ideal comfort and efficiency.

NEW!

Diapath is now part of StatLab. Products available beginning in Q4 2025

A modular solution, designed to simplify the workflow.

The Dante Embedding System was designed with healthcare professionals in mind, combining an ergonomic, linear design with flexible, independent modules to fit any lab space.

By improving posture and reducing strain on the musculoskeletal system, Dante helps make daily workflows more efficient and comfortable—so you can focus on precision without sacrificing well-being.

BOOST FUNCTION

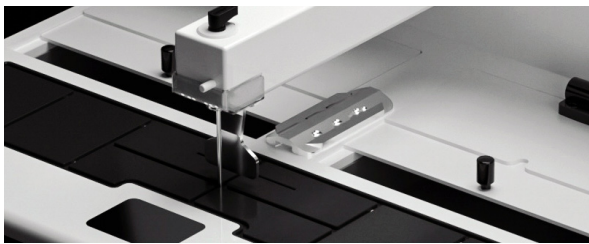

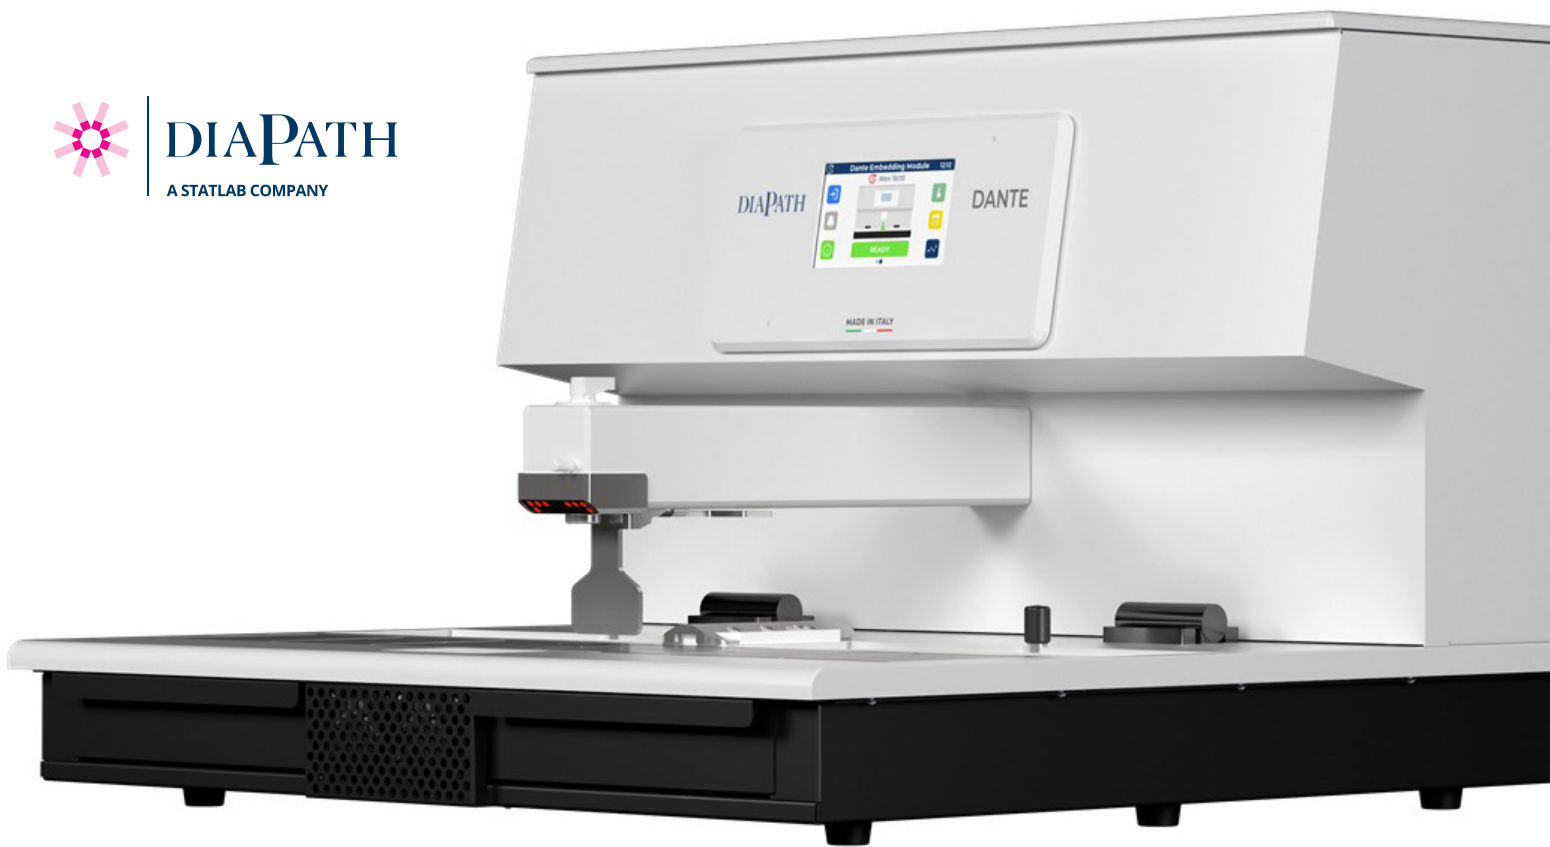

For full operation just 30 minutes after switch-on.

REFILL FUNCTION

With prompt paraffin filling alert on the display.

ULTRASONIC SENSOR

The Innovative system offers automatic dispensing, detecting the mold under the dispensing arm.

TANK INCREASED BY 6 L

The wide paraffin tank is equipped with a filtration system, ensuring paraffin is free from impurities.

CUSTOMIZATION

Create advanced personalization options by user.

MAGNIFYING GLASS

Magnifying glass with LED light ensures samples are easy to see.

SMALL HISTOLOGY EQUIPMENT

StatLab's innovative portfolio of small laboratory equipment is designed with a small footprint for strategic placement in the lab workflow.

All small equipment is easy to use and clean, and includes an anti-microbial coating. Manufactured in the UK with high-quality standards, it's built for reliable, everyday lab performance.

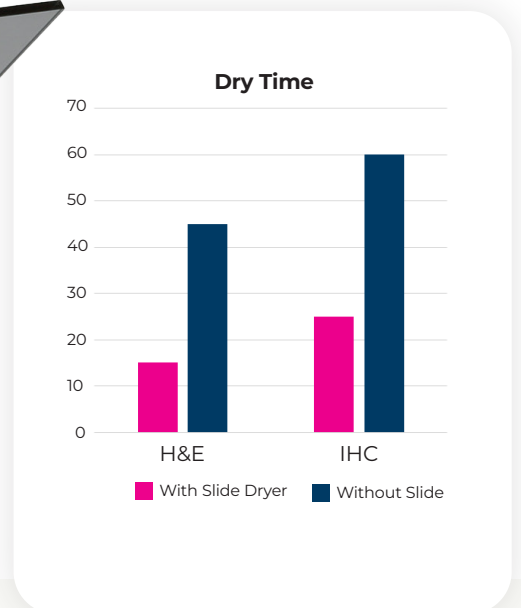

High Capacity Slide Dryer

Designed to give maximum drying capacity for high workload laboratories. Holds up to 390 slides when used without the optional racks, and 240 when used with the rack and timers. Reduce drying time by up to 70% with this circulating air dryer.

BEST-SELLER

SPECIFICATIONS

High Capacity Slide Dryer	SI-SDR-HC
Dimensions	18.3in x 12.6in x 13.2in (D x W x H) 465mm x 320mm x 335mm (D x W x H)
Weight	33.7 lbs (15.3Kg)
Power Requirements	220V/240V a.c. 50-60Hz
4 Rack Timer Unit (1-4), sold separately	SL-SDR-TMR1
4 Rack Timer Unit (5-8), sold separately	SL-SDR-TMR2
8 Slide Rack Holder, sold separately	SL-SDR-HLDR

High Capacity Paraffin Dispenser

The StatLab High Capacity Paraffin Dispenser has a substantial 15L capacity, designed to satisfy the demands of high volume laboratories that require constant on-demand supply of paraffin. This dispenser has two separate 7.5L tanks which can be operated independently to provide greater flexibility. Having two separate tanks also encourages LEAN laboratory workflows and improves efficiency. One tank can be ready for paraffin dispensing while the other is in the process of melting, resulting in no downtime.

Designed to rapidly warm up, which means melted paraffin in 30 minutes, and heated nozzles to help prevent clogging from hardened paraffin.

SPECIFICATIONS

Item Number	SI-PWD-LG
Dimensions	16.6in x 14in x 18in (D x W x H) 420.5mm x 358mm x 454.5mm (D x W x H)
Weight	22 lbs (10.0Kg)
Power Requirements	110V/230V a.c. 50-60Hz

Slimline Paraffin Dispenser

The novel design of the StatLab Slimline Paraffin Dispenser ensures a minimal requirement for bench space, while maintaining a large 7.5L capacity tank for melting up to 6kg of pelletized paraffin at a time. Like the high capacity version, it also includes rapid warm up and heated nozzles to help prevent clogging from hardened paraffin.

SPECIFICATIONS

Item Number	SI-PWD-SM
Dimensions	16.6in x 7in x 17in (D x W x H) 420.5mm x 181mm x 435.5mm (D x W x H)
Weight	15.4 lbs (7.0Kg)
Power Requirements	110V/230V a.c. 50-60Hz

SMALL EQUIPMENT

SMALL HISTOLOGY EQUIPMENT

Slimline Slide Drying Hot Plate

The Slimline Slide Drying Hotplate is designed to efficiently dry paraffin tissue sections through the use of a digital temperature control. An ultra-fast heating system ensures a rapid warm up time prior to use and removes stubborn wrinkles in paraffin sections.

SPECIFICATIONS

Item Number	SI-SDH-SLIM
Dimensions	7.2in x 17.7in x 3.4in (D x W x H) 183mm x 450mm x 85.5mm (D x W x H)
Weight	4.4 lbs (2.2Kg)
Power Requirements	110V/230V a.c. 50-60Hz

Mini Slimline Hot Plate

Designed with a small footprint, ideal for use at the microtome. It is primarily used to remove stubborn wrinkles from tissue sections and re-orientating embedded tissue. It may also be used in microbiology for heat fixing bacterial smears.

SPECIFICATIONS

Item Number	SI-SDH-MINI
Dimensions	5.7in x 5.7in x 2.6in (D x W x H) 145mm x 145mm x 65mm (D x W x H)
Power Requirements	110V/230V a.c. 50-60Hz

Block Trimmer+

Efficiently removes excess paraffin from the outside of a tissue cassette following embedding. The edges and writing surface of the tissue cassette are de-waxed effortlessly by pressing the paraffin block across the patterned heated work surface.

CUSTOMER-FAVORITE

SPECIFICATIONS

Item Number	SI-TBT-PLUS
Dimensions	8in x 6in x 7.2in (D x W x H) 202mm x 152mm x 183.5mm (D x W x H)
Weight	5.0 lbs (3.0Kg)
Power Requirements	Dual Voltage 110V/230V a.c. 50-60Hz

Digital Tissue Flotation Water Bath

The digital model incorporates an innovative digital control that accurately maintains water temperature and allows tissue sections to be efficiently flattened. It also incorporates an extra deep 90mm bowl to allow slides to be fully dipped at an angle without touching the bottom.

SPECIFICATIONS

Digital Tissue Water Bath	SI-TWB-RND
Dimensions	14.6in x 11.6in x 5.3in (D x W x H) 370mm x 295mm x 135mm (D x W x H)
Weight	22 lbs (10.0Kg)
Power Requirements	110V/230V a.c. 50-60Hz
Water Bath Lid, sold separately	SI-TWB-RND-LID

Digital Tissue Flotation Water Bath with Removable Glass Bowl

NEW!

Features blue or white LED back lighting with dimmer control for better section visibility, advanced safety features, an antimicrobial finish, a removable Pyrex glass dish, and an optional drop-on lid for improved heating efficiency.

SPECIFICATIONS

Item Number	SI-TWB-GLASS
Glass Bowl	7.3in x 4.7in x 2.2in (D x W x H)
Dimensions	185.4mm x 185.4mm x 55.9 (D x W x H)
Glass Bowl Volume	4.4 pints (2.1L)
Power Requirements	Dual Voltage 110V/230V a.c. 50-60Hz

SI-TWB-GLASS

Deluxe Tissue Flotation Water Bath with Removable Glass Bowl

NEW!

Includes a heated slide drying block with capacity for 12 microscope slides, arranged in two rows of six, and a heated slide orienting block module designed to efficiently de-wrinkle stubborn sections.

Item Number	SI-TWB-GLASS/WB

GENERAL LABORATORY

FLAMMABLE STORAGE CABINETS

Securall® Flammable Cabinets have been an industry standard for the last 50 years. All flammable cabinets are OSHA, NFPA, UFC, and EPA code compliant.

- Double wall construction, with 1 ½" air space
- Heavy duty reinforced 18 gauge all welded construction
- Galvanized steel shelving
- Leak-proof 2" deep sill, prevents leakage
- Adjustable zinc plated leveling legs
- Finished in 2-part, chemical, UV, and impact resistant urethane paint

CHEMICAL MONITORING & SPILL CONTROL

BEST-SELLER

FormaGuard™ Formalin Neutralizing Pads

FormaGuard™ Pads provide an effective way for lab personnel to guard against formaldehyde vapors and exposure by allowing formalin penetration into a highly absorbent core. The FormaGuard™ Pad is light blue, rigid, polycoated, and roughly 1/8" in thickness.

Small (8" x 11"), 25/pack	FGP0811
Medium (11" x 15"), 25/pack	FGP1115
Large (15" x 20"), 25/pack	FGP1520
Roll, each 13 1/2" X 30'	FGP13530

Fan Pad-GL™ Formalin Neutralizing Pads

Specially treated pad that absorbs formaldehyde. After absorption, formaldehyde is converted to a non-hazardous polymer eliminating harmful vapors. Fan Pad minis are also especially useful in the clean up of small formalin spills.

Mini (11" x 10 3/4"), 55/roll, 6 rolls /case	FAN55
Small (6" x 14"), 48 pads/case	FAN614
Large (8" x 25"), 30 pads/case	FAN825

Dry Mats™

Dry Mats™ are a unique solution for aggressive spill response and formalin vapor control. Highly absorbent and dry 12" x 13" sheets contain a proprietary formaldehyde-specific neutralizer. For grossing stations, countertops, storage cabinets, and any area where formaldehyde is present.

4 packs of 50 mats/case, 200 mats	1728-54
-----------------------------------	---------

Lab Countertop Absorbent Sheets

Manufactured using 'non-slip' film technology. Each sheet consists of four layers of wet-strength tissue, embossed together and adhesive-laminated to a polypropylene moisture barrier. These sheets are excellent for use in areas of routine and special staining and coverslipping, placing under a microtome, or in any other general lab application.

12" x 20", 600/case	LS-110100
18" x 20", 400/case	LS-110101

Be prepared with everything you need to quickly, safely and confidently respond to hazardous spills including acids, bases, solvents, and aldehydes.

Spill Response Kit, Multi-purpose

Contents:

- Granular shaker bottles to treat acid, base, solvent, and aldehyde spills
- Safety goggles
- Gloves
- Waste bag
- Broom/pan combination

Each	CWGP3204

GENERAL LABORATORY

ACTIVATED CARBON FILTERS

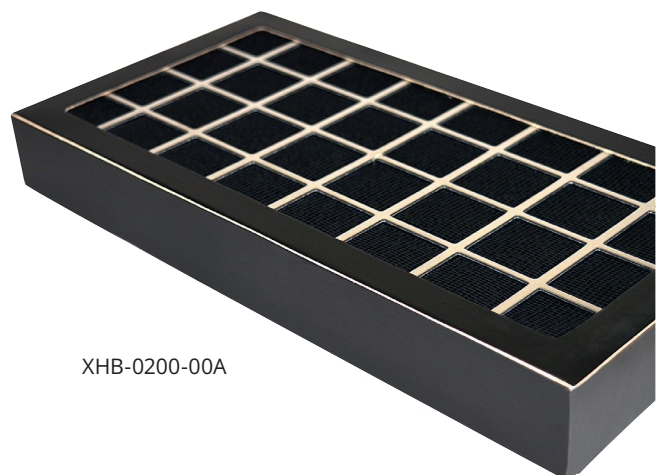

For a variety of popular laboratory instrument brands.

Effective

Filters contain high grade activated carbon which will absorb most organic and inorganic vapors including xylene, toluene, methanol, formalin, isopropyl alcohol and industrial denatured alcohol.

Unbeatable Value

These products are identical in size and shape to their comparable original manufacturer filters, and are an easy drop-in replacement. Change filters at manufacturer-recommended intervals to keep your laboratory and staff safe.

SAFETECH VAPOR MONITORING

Vapor monitoring is important to ensure the safety of employees and comply with OSHA guidelines. StatLab makes it easy to monitor vapor levels of formaldehyde, xylene, isopropyl alcohol, and ethanol in your laboratory.

SafeTech™ Monitoring Badges

Monitoring badges for alcohol, xylene, and formaldehyde exposure. Includes prepaid analysis for 8-hour or 15-minute exposure readings. Complies with OSHA standards for vapor exposure in the workplace. Badges are sold individually unless otherwise noted.

Organics Vapor Monitor (Ethanol, Isopropyl, and Xylene), 1 each	VMB-ORGANICS
Organics Vapor Monitor (Ethanol, Isopropyl, and Xylene) 5/box	VMB-ORGANICS/5
Formaldehyde Vapor Monitor, 1 each	VMB-FORM
Formaldehyde Vapor Monitor, 5/box	VMB-FORM/5

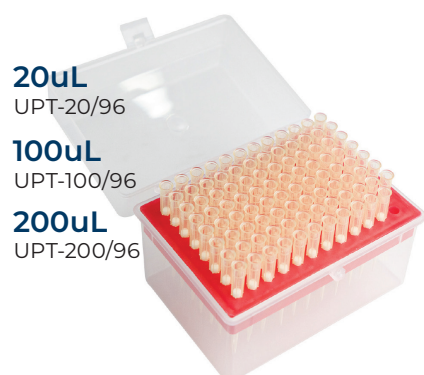

Simply send the badges in and access results on StatLab.com. You're supported every step of the way at [StatLab.com/vapormonitoring](https://www.statlab.com/vapormonitoring) with videos, result interpretation guides and more.

GENERAL LABORATORY

GENERAL LAB ACCESSORIES

StatLab can provide your lab even the most routine items.

Precut Gauze

For general use or for coverslipping. Non-sterile. 200 per pack.

Durable rayon polyester, 4" x 4" x 4 ply	7634
Cotton sponges, highly absorbent, low lint, 4" x 4" x 8 ply	7610
Cotton sponges, highly absorbent, low lint, 4" x 4" x 12 ply	7623

Lab Wipes, Large, 12" x 13"

Low lint, heavy-duty, air-layered material. Use as an absorbent work surface for coverslipping or for general lab clean-up.

50/pack	SL5790
---------	--------

StatSwipes

Pop-up dispenser box designed to give you perfect dispensing of StatSwipes. . For cleaning water bath or use in any low lint application. Pair with the Push Up Box™ which prevents the top-most tissue from falling back into the StatSwipes box. Sold separately.

4.4" x 8.4", 280 sheets/box	SL5511
Push-Up Box™ 5"x5", White	TWD00101E

Slide Boxes

Blue plastic slide boxes made from durable HDPE with hinged lid, foam cushioning, and locking mechanism.

25 slide capacity, blue, foam liner	SBF25-B
50 slide capacity, blue, foam liner	SBF50-B
100 slide capacity, blue, foam liner	SBF100-B

Transfer Pipettes

Disposable. Practical and economical. 3 mL, low density, polyethylene. Non-sterile.

500/box	CT2000
---------	--------

Transfer Pipettes

Grossing Pipettes

Disposable 3 mL pipette with large aperture. Used for easy removal of small specimens from fixative containers and to facilitate transfer into cassette. Protects delicate specimens where forcep removal may damage tissue.

500/box	CT2000-CUT
---------	------------

Grossing Pipettes

Parafilm™ M Self-Sealing Flexible Film

Made of a semi-transparent, flexible and waterproof material, film is resistant to most acids and alcohols.

2" x 250' roll	PM992
----------------	-------

4" x 150' roll	PM996
----------------	-------

Formalin Warning Label

Pressure sensitive, permanent adhesive. Satisfies OSHA 1910.1200 (f) requirements. Right side of label provides space for patient name, date, DOB, specimen ID, and doctor.

1,000/roll	FL1X3
------------	-------

Pinfed Slide Labels

Die-cut 15/16" x 15/16", 6 across. Carrier width 7". Packaged 25,000 per box. Fan-folded and perforated between each row.

1,000/each - 25,000/box	MLPF6
-------------------------	-------

Safe Cube Dispenser

Safe Cube Dispenser, spill containment device with alarm.

Ergonomic. Efficient.

All StatLab reagents will ship in StatGrip bottles beginning in July 2025.

New StatGrip™ gallon bottles offer ergonomic handling, smarter storage, and the perfect pour in every lab.

Redefining Lab Efficiency

StatGrip is the only bottle designed by lab techs for lab techs. The same StatLab gallon reagents you rely on will now be delivered in StatGrip bottles, backed by patented features and StatLab U.S. manufacturing for consistency and reliability.

Bottles are manufactured in StatLab's Arlington, TX ISO-13485 certified facility in close proximity to reagent manufacturing. Making bottles near production sites ensures uninterrupted supply, tighter quality control, and lowers transportation impact to support more sustainable, eco-conscious operations.

StatGrip, Powered by HistoFlow™

- ✔ Ergonomic for easier handling
- ✔ Splash-free, faster pouring
- ✔ Built to maximize storage
- ✔ New packaging reduces damages
- ✔ Made by StatLab in the USA

An **improved rim design** delivers a tighter lid seal to safeguard against harsh chemicals leaking during transit.

Patented **HistoFlow™ air channel** ensures a smooth, splash-free pour, while saving 5–7 seconds per use¹.

New back handle, and new ribs on both handles provide a secure grip for pouring—even when wet—making storage and handling safer and easier.

We're innovating pathology essentials. Together.
